INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited

Note 1: Basis of Presentation

The accompanying interim consolidated condensed financial statements of Intel Corporation have been prepared in conformity with accounting principles generally accepted in the United States (U.S.), consistent in all material respects with those applied in the company's Annual Report on Form 10-K for the year ended December 27, 2003. The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and judgments that affect the amounts reported in the financial statements and accompanying notes. The accounting estimates that require management's most difficult and subjective judgments include: the assessment of recoverability of goodwill and property, plant, and equipment; the valuation of non-marketable equity securities and inventory; and the recognition and measurement of income tax assets and liabilities. The actual results experienced by the company may differ from management's estimates.

The interim financial information is unaudited, but reflects all normal adjustments that are, in the opinion of management, necessary to provide a fair statement of results for the interim periods presented. The interim financial statements should be read in connection with the financial statements in the company's Annual Report on Form 10-K for the year ended December 27, 2003.

Note 2: Employee Stock Benefit Plans

Intel continues to account for its stock option plans under the intrinsic value recognition and measurement principles of APB Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations. Under all of the company's stock option plans, the option exercise price is equal to the market price of Intel common stock (defined as the average of the high and low trading prices reported by The NASDAQ Stock Market*) at the date of grant. Accordingly no stock-based compensation, other than acquisition related compensation, is recognized in net income. In prior years, Intel also assumed the stock option plans and the outstanding options of certain acquired companies. No additional stock options will be granted under these assumed plans. Options granted by Intel currently expire no later than 10 years from the grant date. Options granted to existing and newly hired employees generally vest in increments over four or five years from the date of grant, and certain grants to key employees have delayed vesting generally beginning six years from the date of grant. In addition to the stock option plans, the company also has a Stock Participation Plan, under which eligible employees may purchase shares of Intel's common stock at 85% of the market price at specific, predetermined dates.

Intel's 1984 Stock Option Plan, as amended, expires in May 2004, and the 1997 Stock Option Plan, as amended, expires in January 2007. Intel has proposed a new equity incentive plan for stockholder vote at its May 2004 Annual Stockholders' Meeting. Contingent on stockholder approval, this new equity incentive plan would replace both the expiring 1984 Plan and the 1997 Plan, which would be terminated early.

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

Because the exercise price of options granted under these stock option plans was equal to the market price of the underlying common stock on the grant date, no stock-based employee compensation cost, other than acquisition-related compensation, is recognized in net income. The following table illustrates the effect on net income and earnings per share if the company had applied the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) No. 123, "Accounting for Stock-Based Compensation," as amended, to options granted under the stock option plans and rights to acquire stock granted under the company's Stock Participation Plan, collectively called "options." For purposes of this pro forma disclosure, the value of the options is estimated using a Black-Scholes option pricing model and amortized ratably to expense over the options' vesting periods. Because the estimated value is determined as of the date of grant, the actual value ultimately realized by the employee may be significantly different.

(In Millions—Except Per Share Amounts)	Three Months Ended	
	March 27, 2004	March 29, 2003
Net income, as reported	\$ 1,730	\$ 915
Less: Total stock-based employee compensation expense determined under the fair value method for all options, net of tax	288	298
Pro forma net income	\$ 1,442	\$ 617
Reported basic earnings per common share	\$ 0.27	\$ 0.14
Reported diluted earnings per common share	\$ 0.26	\$ 0.14
Pro forma basic earnings per common share	\$ 0.22	\$ 0.09
Pro forma diluted earnings per common share	\$ 0.22	\$ 0.09

SFAS No. 123 requires the use of option pricing models that were not developed for use in valuing employee stock options. The Black-Scholes option pricing model was developed for use in estimating the fair value of short-lived exchange traded options that have no vesting restrictions and are fully transferable. In addition, option pricing models require the input of highly subjective assumptions, including the option's expected life and the price volatility of the underlying stock. Because the company's employee stock options have characteristics significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in the opinion of management, the existing models do not necessarily provide a reliable single measure of the fair value of employee stock options.

The weighted average estimated value of employee stock options granted during the first quarter of 2004 was \$15.00 (\$8.75 for the first quarter of 2003). The value of options granted was estimated at the date of grant using the following weighted average assumptions:

	Three Months Ended	
	March 27, 2004	March 29, 2003
Expected life (in years)	5.3	7.2
Risk free interest rate	3.0%	3.3%
Volatility	.52	.51
Dividend yield	.5%	.4%

An analysis of historical information is used to determine the assumptions used, to the extent that historical information is relevant, based on the terms of the grants being issued in any given period. The expected life for options granted in the first quarter of 2004 reflects the fact that fewer grants with extended vesting periods were given to key officers and other senior-level employees than in the first quarter of 2003.

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

Under the Stock Participation Plan, rights to purchase shares are only granted during the first and third quarter of each year. The estimated value of rights to purchase shares granted under the Stock Participation Plan during the first quarter of 2004 was \$7.29 (\$5.19 for the first quarter of 2003) and was estimated at the date of grant using the following assumptions:

	Three Months Ended	
	March 27, 2004	March 29, 2003
Expected life (in years)	.5	.5
Risk free interest rate	1.0%	1.2%
Volatility	.31	.54
Dividend yield	.5%	.4%

Additional information with respect to stock option plan activity is as follows:

(Shares in Millions)	Shares Available for Grant	Outstanding Options	
		Number of Shares	Weighted Average Exercise Price
December 28, 2002	921.8	845.4	\$ 25.31
Grants	(109.9)	109.9	\$ 20.22
Exercises	—	(63.7)	\$ 10.08
Cancellations	40.0	(41.5)	\$ 30.49
Reduction in shares available for grant	(325.0)	—	—
December 27, 2003	526.9	850.1	\$ 25.54
Grants	(4.0)	4.0	\$ 32.64
Exercises	—	(16.2)	\$ 11.43
Cancellations	7.3	(7.6)	\$ 29.90
March 27, 2004	530.2	830.3	\$ 25.80

Under the Stock Participation Plan, 76.4 million shares remained available for issuance at March 27, 2004 out of 944 million shares authorized. Employees purchased 9.5 million shares for \$201 million in the first quarter of 2004 (12.2 million shares for \$175 million in the first quarter of 2003). The next scheduled purchase under the Stock Participation Plan is in the third quarter of 2004.

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

Note 3: Earnings Per Share

The shares used in the computation of the company's basic and diluted earnings per common share are as follows:

(In Millions)	Three Months Ended	
	March 27, 2004	March 29, 2003
Weighted average common shares outstanding	6,480	6,556
Dilutive effect of employee stock options	144	54
Weighted average common shares outstanding, assuming dilution	6,624	6,610

Weighted average common shares outstanding, assuming dilution, includes the incremental effect of shares that would be issued upon the assumed exercise of stock options. For the first quarter of 2004, approximately 197 million of the company's stock options outstanding were excluded from the calculation of diluted earnings per share because the exercise prices of the stock options were greater than or equal to the average share price for the quarter, and therefore their inclusion would have been anti-dilutive (681 million in the first quarter of 2003). These options could be dilutive in the future if the average share price increases and is greater than the exercise price of these options.

Note 4: Common Stock Repurchase Program

During the first quarter of 2004, the company repurchased 49.2 million shares of common stock under the company's authorized repurchase program at a cost of \$1.5 billion (62.6 million shares for \$1.0 billion during the first quarter of 2003). Since the program began in 1990, the company has repurchased and retired approximately 1.9 billion shares at a cost of approximately \$36 billion. As of March 27, 2004, approximately 365 million shares remained available for repurchase under the existing repurchase authorization.

Note 5: Trading Assets

Trading assets at fair value at the end of each period were as follows:

(In Millions)	March 27, 2004	December 27, 2003
Debt instruments	\$ 2,265	\$ 2,321
Equity securities offsetting deferred compensation	307	304
Total	\$ 2,572	\$ 2,625

Note 6: Inventories

Inventories at the end of each period were as follows:

(In Millions)	March 27, 2004	December 27, 2003
Raw materials	\$ 355	\$ 333
Work in process	1,682	1,490
Finished goods	759	696
Total	\$ 2,796	\$ 2,519

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

Note 7: Gains (Losses) on Equity Securities, Net

Net gains (losses) on investments in equity securities and certain equity derivatives were a gain of \$19 million for the first quarter of 2004 (a loss of \$127 million for the first quarter of 2003). These gains (losses) included impairments of non-marketable equity securities of approximately \$11 million for the first quarter of 2004 (\$140 million for the first quarter of 2003).

Note 8: Interest and Other, Net

Interest and other, net included:

(In Millions)	Three Months Ended	
	March 27, 2004	March 29, 2003
Interest income	\$ 71	\$ 68
Interest expense	(18)	(14)
Other, net	(4)	(2)
Total	\$ 49	\$ 52

Note 9: Goodwill

Goodwill by operating segment was as follows:

(In Millions)	Intel Communications Group	Intel Architecture Business	Total
December 27, 2003	\$ 3,638	\$ 67	\$ 3,705
Transfer	(466)	466	—
March 27, 2004	\$ 3,172	\$ 533	\$ 3,705

During the first quarter of 2004, the consumer electronics business, which was previously part of the former Intel Communications Group (ICG) operating segment, was moved into the Intel Architecture business. Based on the estimated relative fair value of the consumer electronics business to the ICG reporting unit, goodwill of \$466 million was transferred to the Intel Architecture business. No goodwill was recognized as a result of acquisitions and no goodwill was impaired during the first quarter of 2004. In addition, during the first quarter of 2004, ICG and the Wireless Communications and Computing Group (WCCG) were merged and now represent one operating segment (see “Note 14: Operating Segment Information”).

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

Note 10: Identified Intangible Assets

During the first quarter of 2004, the company acquired intellectual property assets for approximately \$83 million with a weighted average life of 5.4 years. The majority of the increase in intellectual property assets acquired represented the value of assets capitalized as a result of payments under the settlement agreement with Intergraph Corporation (see “Note 13: Contingencies”). Also during the first quarter of 2004, the company terminated a license agreement valued at \$8 million and extinguished the associated remaining liability. Identified intangible assets as of March 27, 2004 consisted of the following:

(In Millions)	Gross Assets	Accumulated Amortization	Net
Acquisition-related developed technology	\$ 692	\$ (503)	\$ 189
Other acquisition-related intangibles	62	(23)	39
Intellectual property assets	672	(240)	432
Total identified intangible assets	\$ 1,426	\$ (766)	\$ 660

Identified intangible assets as of December 27, 2003 consisted of the following:

(In Millions)	Gross Assets	Accumulated Amortization	Net
Acquisition-related developed technology	\$ 994	\$ (772)	\$ 222
Other acquisition-related intangibles	94	(49)	45
Intellectual property assets	604	(212)	392
Total identified intangible assets	\$ 1,692	\$ (1,033)	\$ 659

Other acquisition-related intangibles include items such as workforce-in-place and customer lists. Intellectual property assets primarily represent acquired technology licenses. Identified intangible assets are classified within other assets on the balance sheet.

All of the company’s identified intangible assets are subject to amortization. Amortization of acquisition-related intangibles and costs included the following:

(In Millions)	Three Months Ended	
	March 27, 2004	March 29, 2003
Amortization of acquisition-related intangibles	\$ 39	\$ 56
Amortization of acquisition-related unearned stock compensation	7	11
Other acquisition-related costs	12	17
Total	\$ 58	\$ 84

Other acquisition-related costs include the amortization of deferred cash payments that represent contingent compensation to employees related to previous acquisitions. The compensation is being recognized over the period earned.

Amortization of intellectual property assets was \$35 million for the first quarter of 2004 (\$35 million for the first quarter of 2003).

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

Based on identified intangible assets recorded at March 27, 2004, and assuming no subsequent impairment of the underlying assets, the amortization expense for each period, excluding acquisition-related stock compensation and other acquisition-related costs, is expected to be as follows:

(In Millions)	2004 ¹	2005	2006	2007	2008
Acquisition-related intangibles	\$ 104	\$ 101	\$ 21	\$ 2	\$ —
Intellectual property assets	\$ 82	\$ 95	\$ 86	\$ 57	\$ 48

¹Reflects the remaining nine months of fiscal 2004.

Note 11: Long-Term Debt

Holders of the company's zero coupon senior exchangeable notes (Intel notes) had the right, prior to January 12, 2004, to exchange their Intel notes for Samsung Electronics Co., Ltd. convertible notes (Samsung notes) owned by Intel. The Intel notes matured in February 2004. As of March 27, 2004, Intel note holders had either exercised their right to exchange their Intel notes for Samsung notes owned by Intel or received repayment of the principal amount of their Intel notes from Intel upon maturity.

Note 12: Comprehensive Income

The components of other comprehensive income, net of tax, were as follows:

(In Millions)	Three Months Ended	
	March 27, 2004	March 29, 2003
Net income	\$ 1,730	\$ 915
Change in net unrealized holding gain on available-for-sale investments	54	(5)
Change in net unrealized holding gain on derivatives	7	5
	<u>\$ 1,791</u>	<u>\$ 915</u>

The components of accumulated other comprehensive income, net of tax, were as follows:

(In Millions)	March 27, 2004	December 27, 2003
Accumulated net unrealized holding gain on available-for-sale investments	\$ 89	\$ 35
Accumulated net unrealized holding gain on derivatives	69	62
Accumulated minimum pension liability	(1)	(1)
Total accumulated other comprehensive income	<u>\$ 157</u>	<u>\$ 96</u>

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

Note 13: Contingencies

Tax Matters

In August 2003, in connection with the IRS's regular examination of Intel's tax returns for the years 1999 and 2000, the IRS proposed certain adjustments to the amounts reflected by Intel on these returns as a tax benefit for its export sales. If the IRS issues formal assessments consistent with the notices and ultimately prevails in its position, Intel's federal income tax due for these years would increase by approximately \$600 million, plus interest. The IRS may make similar claims for years subsequent to 2000 in future audits.

Intel disputes the proposed adjustments and intends to pursue this matter through applicable IRS and judicial procedures, as appropriate. Although the final resolution of the proposed adjustments is uncertain, based on currently available information, management believes that the ultimate outcome will not have a material adverse effect on the company's financial position, cash flows or overall trends in results of operations. In the event of an unfavorable resolution, there exists the possibility of a material adverse impact on the results of operations of the period in which the matter is ultimately resolved, or an unfavorable outcome becomes probable and reasonably estimable.

Legal Proceedings

In 1997, Intergraph Corporation filed suit in Federal District Court in Alabama, generally alleging, among other claims, that Intel infringed certain Intergraph patents. In August 2001, Intergraph filed a second suit in the U.S. District Court for the Eastern District of Texas, alleging that Intel infringed additional Intergraph patents, and seeking an injunction and unspecified damages. In 2002, Intel and Intergraph entered into a settlement agreement, pursuant to which they agreed to settle the Alabama lawsuit and dismiss it with prejudice. Pursuant to the 2002 settlement agreement, Intel made a cash payment of \$300 million to Intergraph and received a license under all Intergraph patents, excluding the patents at issue in the Texas case. Intel recorded \$155 million of the payment as a charge to cost of sales in 2002. The remaining \$145 million represented the value of the license received and was capitalized as an intangible asset.

Under the 2002 settlement agreement, if the patents in the Texas case were found to be infringed, Intel would pay Intergraph \$150 million. If Intergraph prevailed on either patent on appeal, the 2002 settlement agreement provided that Intel would pay Intergraph an additional \$100 million and receive a license for the patents at issue in the case. In 2002, the Texas District Court ruled that Intel infringed both patents at issue in that case. Pursuant to the settlement agreement, Intel paid Intergraph \$150 million. Intel then appealed the decision. In February 2004, the Court of Appeals for the Federal Circuit found that the District Court had erred, and remanded the case to the District Court to determine in the first instance whether the patents at issue had been infringed.

In 2002, Intergraph filed suit in the Eastern District of Texas against Dell Inc., Gateway Inc. and Hewlett-Packard Company, alleging infringement of three of Intergraph's patents. These three patents are a subset of the patents that were the subject of the Alabama lawsuit that Intergraph had filed against Intel. In 2003, Dell filed its answer and counterclaim and named Intel as well as Intergraph in a counterclaim for declaratory judgment.

In March 2004, Intel and Intergraph entered into a second settlement agreement, pursuant to which they agreed to settle the Texas lawsuit, and Intergraph agreed to dismiss Intergraph's separate pending litigation against Dell Inc. Both cases were dismissed with prejudice. Pursuant to the 2004 settlement agreement, Intel will pay Intergraph a total of \$225 million—\$125 million was paid by April 5, 2004 and Intel will pay \$25 million in each of the following four quarters. Also pursuant to the 2004 settlement agreement, Intergraph granted Dell a license under patents filed prior to April 4, 2012 to sell Dell products, including Dell computer systems that contain Intel microprocessors. The 2004 settlement agreement further provided that Intergraph is entitled to retain the \$150 million previously paid by Intel pursuant to the 2002 settlement agreement, but that no additional \$100 million payment would be required under the 2002 settlement agreement. The 2004 settlement agreement also includes additional license rights in favor of Intel and Intel's customers and a covenant by Intergraph not to sue any Intel customer for products that include Intel microprocessors, Intel chipsets and Intel motherboards in combination. As a result of the 2004 settlement agreement, Intel recorded a \$162 million charge to cost of sales in the first quarter of 2004. The remaining balance of \$63 million represents the value, as of March

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

27, 2004, of intellectual property assets acquired as part of this settlement. This balance will be amortized over the assets' remaining useful lives.

In March 2004, MicroUnity, Inc. filed suit in the Eastern District of Texas against Intel and Dell Inc. MicroUnity claims that certain Intel microprocessors infringe seven MicroUnity patents, and that certain Intel chipsets infringe one MicroUnity patent. MicroUnity also alleges that Dell products incorporating these Intel products also infringe the MicroUnity patents. MicroUnity seeks an injunction, unspecified damages and attorneys' fees. The company disputes MicroUnity's claims and intends to defend the lawsuit vigorously.

In June 2002, various plaintiffs filed a lawsuit in the Third Judicial Circuit Court, Madison County, Illinois, against Intel, Hewlett-Packard Company, HPDirect, Inc. and Gateway Inc., alleging that the defendants' advertisements and statements misled the public by suppressing and concealing the alleged material fact that systems that use the Intel Pentium® 4 processor are less powerful and slower than systems using the Intel Pentium III processor and a competitor's processors. The plaintiffs claim that their lawsuit should be treated as a nationwide class action. The plaintiffs seek unspecified damages, and attorneys' fees and costs. The company disputes the plaintiffs' claims and intends to defend the lawsuit vigorously.

The company is currently a party to various claims and legal proceedings, including those noted above. If management believes that a loss arising from these matters is probable and can reasonably be estimated, the company records the amount of the loss, or the minimum estimated liability when the loss is estimated using a range and no point within the range is more probable than another. As additional information becomes available, any potential liability related to these matters is assessed and the estimates are revised, if necessary. Based on currently available information, management believes that the ultimate outcome of these matters, individually and in the aggregate, will not have a material adverse effect on the company's financial position or overall trends in results of operations. However, litigation is subject to inherent uncertainties, and unfavorable rulings could occur. An unfavorable ruling could include monetary damages or an injunction prohibiting Intel from selling one or more products. If an unfavorable ruling were to occur, there exists the possibility of a material adverse impact on the results of operations of the period in which the ruling occurs, or future periods.

Note 14: Operating Segment Information

In December 2003, the company announced that in 2004 it would be consolidating its communications-related businesses into a single organization, the Intel Communications Group (ICG). Previously, these communications businesses were in two separate product line operating segments: the former Intel Communications Group and the Wireless Communications and Computing Group. Beginning in the first quarter of 2004, the company is presenting operating segment results under the new organizational structure. The company now reports two product-line operating segments: the Intel Architecture business, which is composed of the Desktop Platforms Group, the Mobile Platforms Group and the Enterprise Platforms Group; and ICG. Prior to the combining of the communications-related businesses, the consumer electronics business, which was previously part of ICG, was moved into the Intel Architecture business. All prior period amounts have been restated to conform to the new presentation.

The company's Executive Office consists of Chief Executive Officer (CEO) Craig R. Barrett and President and Chief Operating Officer (COO) Paul S. Otellini. The CEO and COO have joint responsibility as the Chief Operating Decision Maker (CODM), as defined by SFAS No. 131. The CODM allocates resources to and assesses the performance of each operating segment using information about their revenue and operating profit before interest and taxes.

The Intel Architecture operating segment's products include microprocessors and related chipsets and motherboards. ICG's products include flash memory; wired Ethernet and wireless connectivity products; communications infrastructure components such as network and embedded processors and optical components; microcontrollers; application and cellular processors used in cellular handsets and handheld computing devices; and cellular baseband chipsets.

In addition to these operating segments, the company has sales and marketing, manufacturing, finance and administration groups. Expenses of these groups are allocated to the operating segments and are included in the operating results reported below.

INTEL CORPORATION
NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS – Unaudited (Continued)

The “all other” category includes acquisition-related costs, including amortization and any impairments of acquisition-related intangibles. “All other” also includes the results of operations of seed businesses that support the company’s initiatives. Finally, “all other” includes certain corporate-level operating expenses, including a portion of profit-dependent bonus and other expenses not allocated to the operating segments.

Segment information is summarized as follows:

(In Millions)	Three Months Ended	
	March 27, 2004	March 29, 2003
Intel Architecture Business		
Revenue	\$ 7,025	\$ 5,772
Operating income	\$ 3,015	\$ 1,908
Intel Communications Group		
Revenue	\$ 1,065	\$ 963
Operating loss	\$ (219)	\$ (218)
All Other		
Revenue	\$ 1	\$ 16
Operating loss	\$ (320)	\$ (299)
Total		
Revenue	\$ 8,091	\$ 6,751
Operating income	\$ 2,476	\$ 1,391

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We begin Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) with a discussion of Intel's overall strategy and the strategy for our major business units to give the reader an overview of the goals of our business and the direction in which our business and products are moving. This strategy discussion is followed by a discussion of the "Critical Accounting Estimates" that we believe are important to understanding the assumptions and judgments incorporated in our reported financial results. We then discuss our "Results of Operations," beginning with an Overview, followed by an analysis of changes in our balance sheet and cash flows in the section entitled "Financial Condition." Finally, we conclude this MD&A with our "Business Outlook" section, discussing our outlook for 2004 and the second quarter of 2004.

The various sections of this MD&A contain a number of forward-looking statements, all of which are based on current expectations and could be affected by the uncertainties and risk factors described throughout this filing and particularly in the "Business Outlook" section. Our actual results may differ materially, and these forward-looking statements do not reflect the potential impact of any divestitures, mergers, acquisitions or other business combinations that had not been completed as of April 28, 2004.

Strategy

Our goal is to be the preeminent building block supplier to the worldwide Internet economy. Our primary focus is on developing advanced integrated silicon technology solutions, which we believe will provide the performance and technology features necessary to help accelerate the convergence of computing and communications capabilities. Convergence refers to having computing and communications capabilities in an integrated product solution. We also provide key components for networking and communications infrastructures used to connect technology users. We believe users of computing and communications devices want not only higher performance but also other capabilities such as multithreaded or multitasking capability, seamless networking connectivity, improved security, reliability, ease of use and interoperability among devices. It is our goal to incorporate features addressing these capabilities in our various products to meet user demands.

Effective for the first quarter of 2004, we consolidated our communications-related businesses into a single organization, the Intel Communications Group (ICG). We believe that as computing and communications converge, the consolidation of our previous Intel Communications Group and Wireless Communications and Computing Group (WCCG) will give us the opportunity to better coordinate product planning and our customer focus between our communications infrastructure and wireless client efforts going forward. Prior to the combination of these communications-related businesses, our consumer electronics business, which was previously part of our former ICG operating segment, was moved into our Intel Architecture business. The discussion below and the results of operations for our operating segments in this MD&A are presented under the new organizational structure, and all prior period amounts have been restated to conform to the new presentation.

Both of our operating segments use their core competencies in the design and manufacture of integrated circuits, as well as key silicon and platform capabilities, to provide building blocks for technology solutions. The Intel Architecture business provides advanced technologies to support the desktop, mobile and enterprise computing platforms. ICG focuses on wired and wireless network connectivity products, component-level products and platform solutions for the wireless handheld communications and computing market segments, and key components for networking and communications infrastructure devices.

All of our businesses operate in highly innovative environments characterized by continuing and rapid introduction of new products offering improved performance at lower prices. As part of our overall strategy to compete in each relevant market segment, we use our core competencies and financial resources, as well as our global presence and brand recognition. Also, under our Intel Capital program, we make equity investments in companies around the world to further our strategic objectives and support our key business initiatives. Worldwide, our competitors range in size from large established multinational companies with multiple product lines to smaller companies and new entrants to the marketplace that compete in specialized market segments. With the trend toward convergence in computing and communications products, product offerings will likely cross over multiple categories, offering us new opportunities, but also resulting in more businesses that compete with us. Competition tends to increase pricing pressure on our products, which may mean that we must offer our products at lower prices than we had anticipated, resulting in lower profits. In markets where our competitors have established products and brand recognition, it may be inherently difficult for us to compete against them. When we believe it is appropriate, we will take various steps, including introducing new products and discontinuing older products, reducing prices, and offering rebates and other incentives in order to increase acceptance of our latest products and to be competitive within each relevant market segment.

We plan to continue to cultivate new businesses and work with the computing, communications and consumer electronics industries through standards bodies, trade associations, original equipment manufacturers (OEMs), original design manufacturers (ODMs), and independent software and operating system vendors, to align the industry to offer products that take advantage of the latest market trends and usage models. These efforts include helping to create the infrastructure for wireless network connectivity. We are also working with the industry to develop software applications and operating systems that take advantage of our microprocessors, chipsets and other next-generation semiconductor devices with higher performance or advanced features, including advanced technology capabilities integrated at the silicon level.

Intel Architecture Business

The Intel Architecture business supports the desktop, mobile and enterprise computing platforms. As devices take advantage of converged computing and communications capabilities, our goal is to continue to deliver processors with higher performance and/or advanced technology features such as Hyper-Threading Technology (HT Technology), which can enable multithreading and multitasking, and the features offered with our Intel® Centrino™ mobile technology, which can enhance the mobile computing experience. In addition, we believe that system security and reliability features at the hardware level will facilitate an enhanced computing experience for end users.

For the desktop platform, our strategy is to introduce microprocessors and chipsets with higher performance and/or advanced technology features tailored to the needs of different market segments using a tiered branding approach. In addition, we are working toward introducing components specifically designed for consumer electronics products to be used in the digital home. For the mobile platform, our strategy is to deliver products optimized for some or all of the four mobility vectors: performance, battery life, form factor (the physical size and shape of a device) and wireless connectivity. Our strategy for the enterprise platform is to provide processors and chipsets with high performance and/or advanced technology features, as well as competitive price for performance for entry-level to high-end servers and workstations.

For the desktop performance market segment, we offer the Intel® Pentium® 4 processor to meet the computing needs of users both at home and at work. These processors are optimized to deliver high performance as well as added features across a broad range of business and consumer applications. We also offer the Pentium® 4 processor with HT Technology. When used in a computer system with the other features required to take advantage of this technology, HT Technology allows a multithreaded software program to run as though it uses two processors, even though it uses only one processor. Our current versions of the Pentium 4 processor with HT Technology support the 800-MHz system bus, which allows for faster data transfer into and out of the processor. For the desktop value market segment, we offer the Intel® Celeron® processor, designed to meet the core computing needs and affordability requirements of value-conscious PC users.

For the mobile market segment, we offer processors optimized for performance mobility and portability users, with form factors from sub-notebook and tablet PCs to thin-and-light as well as full-size notebook PCs. For performance mobility users we offer Intel Centrino mobile technology, designed and optimized specifically for the four key vectors of mobility. Intel Centrino mobile technology consists of an Intel® Pentium® M processor and the Intel® 855 chipset family, both offered by the Mobile Platforms Group within the Intel Architecture business, as well as a wireless network connection, which is based on the 802.11 industry standard, from ICG. For portable PC users—who want systems with near-desktop features, including high performance, larger screens, full-size keyboards and multiple hard drives—we offer the Mobile Intel® Pentium® 4 processor. In addition, for the mobile value market segment, we offer the Intel® Celeron® M processor and the mobile Intel Celeron processor.

The Intel Architecture business supports the enterprise platform by offering products that address various levels of data processing and compute-intensive applications. Our Intel® Xeon™ processor family of products, based on our IA-32 architecture, supports a range of entry-level to high-end technical and commercial computing applications for the workstation and server market segments, while our Intel® Itanium® processor family of products supports an even higher level of computing performance for data processing, the handling of high transaction volumes and other compute-intensive applications for enterprise-class servers, as well as supercomputing solutions. The Intel® Xeon™ processor with HT Technology is aimed at two-way servers, also known as dual-processing (DP) servers, and workstations. For servers based on four or more processors, we offer the Intel® Xeon™ processor for multiprocessing (MP) servers with HT Technology. In the first quarter of 2004, we announced plans to introduce Intel Xeon processors based on the IA-32 architecture with Intel® Extended Memory 64 Technology, our 64-bit extension technology, for workstations and servers in mid-2004. For the enterprise-class market segment, we offer the Intel® Itanium® 2 processor, based on 64-bit architecture. We believe that technology industry product developments and the convergence of computing and communications will increase demand for our higher performance enterprise platform products. In particular, we anticipate increased demand for our products to support new developments in data traffic management, storage, and wireless computing and communications needs.

Our microprocessor business generally has followed a seasonal trend; however, there can be no assurance that this trend will continue. In the past five years, the company's sales of microprocessors were higher in the second half of the year.

Intel Communications Group

Within ICG, our strategy is to be the leading supplier of silicon and other component-level communications building blocks for OEMs and other systems builders. We are focused on developing products that we believe will help to build out the Internet as well as developing component-level products for the wireless handheld computing and communications market segments.

In support of the build out of the Internet, we offer products designed for wired Ethernet and wireless connectivity; for the communications infrastructure, including network and embedded processors; and for networked storage. Our strategy for Ethernet connectivity is to expand our product portfolio in the local area network (LAN) market segment and to address the metropolitan area network (MAN) and networked storage market segments. Within the LAN and MAN market segments, we are investing in Gigabit Ethernet, 10-Gigabit Ethernet and wireless technologies based on industry standards for wireless 802.11 (WLAN, or WiFi) mobile applications and the emerging standard supporting 802.16 (or WiMAX) for broadband connectivity. In January 2004, we introduced the Intel® PRO/Wireless 2200BG network connection, featuring both 802.11b and 802.11g wireless functionality for notebook PCs based on Intel Centrino mobile technology. In network processing, we deliver products that are basic building blocks for modular communications platforms. These products include advanced, programmable processors used to manage and direct data moving across the Internet and corporate networks. We also offer embedded processors that can be used for modular communications platform applications as well as for industrial equipment and point-of-sale systems. In the networked storage market segment, we are developing products that allow storage resources to be added at any location on either of the two most prevalent types of storage networks: Ethernet or Fibre Channel.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Component-level products for the wireless handheld computing and communications market segments include flash memory products, applications processors and cellular baseband chipsets. Our strategy for our flash memory products is to offer a broad range of memory densities, leading-edge packaging technology and high-performance functionality. In addition to having offerings that meet the needs of our current cellular customers, we plan to further expand our customer base beyond the core cellular market segment to other market segments such as the broad market segment. The broad market segment includes flash memory products found in applications such as set-top boxes, networking products and other devices such as DVD players and DSL cable modems. In our flash memory product portfolio, we currently offer NOR flash memory products such as Intel StrataFlash[®] Wireless Memory, which uses two-bit-per-cell technology to provide a single-chip solution for fast code execution with higher storage densities and 1.8-volt operation optimized for advanced mobile phone designs. In application processing, Intel XScale[®] technology provides the processing capability in data-enabled mobile phones and PDAs. Addressing the trend toward convergence in computing and communications, we offer stacked packaging solutions (stacking an applications processor on top of memory) as well as packaging that stacks several memory chips together.

Critical Accounting Estimates

The methods, estimates and judgments we use in applying our accounting policies have a significant impact on the results we report in our financial statements, which we discuss under the heading "Results of Operations" following this section of our MD&A. Some of our accounting policies require us to make difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Our most critical accounting estimates include the assessment of recoverability of goodwill, which impacts goodwill impairments; valuation of non-marketable equity securities, which impacts net gains (losses) on equity securities when we record impairments; valuation of inventory, which impacts gross margin; assessment of recoverability of long-lived assets, which primarily impacts gross margin when we impair manufacturing assets or accelerate their depreciation; and recognition and measurement of current and deferred income tax assets and liabilities, which impacts our tax provision. Below, we discuss these policies further, as well as the estimates and judgments involved. We also have other policies that we consider key accounting policies, such as our policies for revenue recognition, including the deferral of revenue on sales to distributors; however, these policies do not meet the definition of critical accounting estimates, because they do not generally require us to make estimates or judgments that are difficult or subjective.

Goodwill. Goodwill is initially recorded when the purchase price paid for an acquisition exceeds the estimated fair value of the net identified tangible and intangible assets acquired. We perform an annual review in the fourth quarter of each year, or more frequently if indicators of potential impairment exist, to determine if the recorded goodwill is impaired. Our impairment review process compares the fair value of the reporting unit to its carrying value, including the goodwill related to the reporting unit. Reporting units may be operating segments as a whole or an operation one level below an operating segment, referred to as a component. Components are defined as operations for which discrete financial information is available and reviewed by segment management. To determine the reporting unit's fair value, our review process uses the income method and is based on a discounted future cash flow approach that uses estimates including the following for the reporting units: revenue, based on assumed market segment growth rates and Intel's assumed market segment share; estimated costs; and appropriate discount rates based on the reporting entities' weighted average cost of capital as determined considering the observable weighted average cost of capital of comparable companies. Our estimates of market segment growth, our market segment share and costs are based on historical data, various internal estimates and a variety of external sources, and are developed as part of our routine long-range planning process. In addition to being used in our goodwill impairment analysis, the same estimates are used in the planning for our long-term manufacturing capacity needs as part of our capital budgeting process and for both long-term and short-term business planning and forecasting. We test the reasonableness of the inputs and outcomes of our discounted cash flow analysis by comparison to available comparable market data. In determining the carrying value of the reporting unit, we must include an allocation of our manufacturing assets because of the interchangeable nature of our manufacturing capacity. This allocation is based on each reporting unit's relative percentage of utilization of our manufacturing assets. Our most recent review of goodwill, in 2003, resulted in a \$611 million non-cash impairment charge related to the then existing WCCG reporting unit. A substantial majority of our remaining recorded goodwill is related to the ICG reporting unit. The estimates we used in our most recent review for ICG assume that we will gain market segment share in the future and that the communications business will experience a gradual recovery and return to growth from the current trends. We may incur charges for the impairment of goodwill in the future if the communications and mobile handheld computing sectors do not grow as we

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

expect, if we fail to deliver new products for ICG, if the products fail to gain expected market acceptance, if we fail to achieve our assumed revenue growth rates or assumed gross margin, or if interest rates increase significantly. Prior to the combination of our communications-related businesses, our consumer electronics business, which was previously part of our former ICG operating segment, was moved to our Intel Architecture business. Based on the estimated relative fair value of the consumer electronics business to the ICG reporting unit, goodwill of \$466 million was transferred to our Intel Architecture business.

Non-Marketable Equity Securities. At March 27, 2004, the carrying value of our portfolio of strategic investments in non-marketable equity securities, excluding equity derivatives, totaled \$661 million (\$665 million at December 27, 2003). Under our Intel Capital program, we make equity investments in companies around the world to further our strategic objectives and support our key business initiatives. The Intel Capital program focuses on investing in companies and initiatives to stimulate growth in the Internet economy and its infrastructure, create new business opportunities for Intel and expand global markets for our products. The investments may support, among other things, Intel product initiatives, emerging trends in the technology industry or worldwide Internet deployment. This strategic investment program helps advance our overall mission to be the preeminent building block supplier to the worldwide Internet economy.

We invest in companies that develop software, hardware and other technologies or provide services supporting technologies. Our current investment focus areas include: enabling mobile and Internet client devices, helping to create the digital home, advancing high-performance communications infrastructure and developing the next generation of silicon production technologies. Our focus areas tend to develop and change over time due to rapid advancements in technology.

We typically invest in non-marketable equity securities of private companies; the proceeds from our investments contribute a portion of the funds required for these companies to grow. Our investment portfolio ranges from early-stage companies that are often still defining their strategic direction to more mature companies whose products or technologies may directly support an Intel product or initiative. We invest for strategic reasons, with each investment also evaluated for potential financial returns. The program seeks to invest in companies and businesses that can succeed and have an impact on their market segment. However, these types of investments involve a great deal of risk, and there can be no assurance that any specific company, whether at an early or mature stage, or somewhere in between, will grow or will become successful, and consequently, we could lose all or part of our investment. When the strategic objectives of an investment have been achieved, or if the investment or business diverges from our strategic objectives, we may decide to dispose of the investment. However, our investments in non-marketable equity securities are not liquid, and there can be no assurance that we will be able to dispose of these investments on favorable terms or at all.

We have an investment in non-voting stock of Elpida Memory, Inc., a Japanese provider of Dynamic Random Access Memory (DRAM), with a carrying amount of \$124 million at March 27, 2004. This investment is intended to help align Elpida's product roadmap, as appropriate, with our roadmap and is part of our investment strategy to support the development and supply of DRAM products. No other investment in our non-marketable portfolio was individually significant as of March 27, 2004.

Our ability to recover our strategic investments in non-marketable equity securities and to earn a return on these investments is primarily dependent on how successfully these companies are able to execute to their business plans and how well their products are accepted, as well as their ability to obtain venture capital funding for continued operations, to grow and to take advantage of liquidity events. In the current equity market environment, their ability to obtain additional funding as well as to take advantage of liquidity events, such as initial public offerings (IPOs), mergers and private sales, remains constrained.

We review all of our investments quarterly for impairment; however, for non-marketable equity securities, the impairment analysis requires significant judgment to identify events or circumstances that would likely have a significant adverse effect on the fair value of the investment. The indicators that we use to identify those events or circumstances include (a) the investee's revenue and earnings trends relative to predefined milestones and overall business prospects, (b) the technological feasibility of the investee's products and technologies, (c) the general market conditions in the investee's industry, and (d) the investee's liquidity, debt ratios and the rate at which the investee is using its cash.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Investments identified as having an indicator of impairment are subject to further analysis to determine if the investment is other than temporarily impaired, in which case we write the investment down to its impaired value. When an investee is not considered viable from a financial or technological point of view, we write down the entire investment since we consider the estimated fair market value to be nominal. If an investee obtains additional funding at a valuation lower than our carrying amount or requires a new round of equity funding to stay in operation and the new funding does not appear imminent, we presume that the investment is other than temporarily impaired, unless specific facts and circumstances indicate otherwise.

We have experienced substantial impairments in our portfolio of non-marketable equity securities as equity markets declined significantly over the past few years. If the level of IPO market activity does not increase and the availability of venture capital funding for technology investments does not improve, our non-marketable investments may be adversely affected. As companies within our portfolio attempt to raise additional funds, the funds may not be available to them or they may receive lower valuations, with less favorable investment terms than in previous financings, and the investments would likely become impaired. However, we are not able to determine at the present time which specific investments are likely to be impaired in the future, or the extent or timing of individual impairments. Impairments of investments in our portfolio, primarily impairments of non-marketable equity securities, were approximately \$11 million in the first quarter of 2004 (approximately \$140 million in the first quarter of 2003).

Inventory. The valuation of inventory requires us to estimate obsolete or excess inventory as well as inventory that is not of saleable quality. The determination of obsolete or excess inventory requires us to estimate the future demand for our products within specific time horizons, generally six months or less. The estimates of future demand that we use in the valuation of inventory are the basis for our published revenue forecast, which is also consistent with our short-term manufacturing plan. If our demand forecast for specific products is greater than actual demand and we fail to reduce manufacturing output accordingly, we could be required to write down additional inventory, which would have a negative impact on our gross margin.

Long-Lived Assets. We assess the impairment of long-lived assets when events or changes in circumstances indicate that the carrying value of the assets or the asset grouping may not be recoverable. Factors that we consider in deciding when to perform an impairment review include significant under-performance of a business or product line in relation to expectations, significant negative industry or economic trends, and significant changes or planned changes in our use of the assets. Recoverability of assets that will continue to be used in our operations is measured by comparing the carrying amount of the asset grouping to the related total future net cash flows. If an asset grouping's carrying value is not recoverable through the related cash flows, the asset grouping is considered to be impaired. The impairment is measured by the difference between the asset grouping's carrying amount and its fair value, based on the best information available, including market prices or discounted cash flow analysis.

Impairments of long-lived assets are determined for groups of assets related to the lowest level of identifiable independent cash flows. Due to our asset usage model and the interchangeable nature of our semiconductor manufacturing capacity, we must make subjective judgments in determining the independent cash flows that can be related to specific asset groupings. In addition, as we make manufacturing process conversions and other factory planning decisions, we must make subjective judgments regarding the remaining useful lives of assets, primarily process-specific semiconductor manufacturing tools and building improvements. When we determine that the useful lives of assets are shorter than we had originally estimated, and there are sufficient cash flows to support the carrying value of the assets, we accelerate the rate of depreciation charges in order to fully depreciate the assets over their new shorter useful lives.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Income Taxes. We must make certain estimates and judgments in determining income tax expense for financial statement purposes. These estimates and judgments occur in the calculation of certain tax assets and liabilities, which arise from differences in the timing of recognition of revenue and expense for tax and financial statement purposes.

We must assess the likelihood that we will be able to recover our deferred tax assets. If recovery is not likely, we must increase our provision for taxes by recording a valuation allowance against the deferred tax assets that we estimate will not ultimately be recoverable. As of March 27, 2004, we believed that all of the deferred tax assets recorded on our balance sheet would ultimately be recovered. However, should there be a change in our ability to recover our deferred tax assets, our tax provision would increase in the period in which we determine that the recovery is not probable.

In addition, the calculation of our tax liabilities involves dealing with uncertainties in the application of complex tax regulations. We recognize liabilities for anticipated tax audit issues in the U.S. and other tax jurisdictions based on our estimate of whether, and the extent to which, additional taxes will be due. If we ultimately determine that payment of these amounts is unnecessary, we reverse the liability and recognize a tax benefit during the period in which we determine that the liability is no longer necessary. We record an additional charge in our provision for taxes in the period in which we determine that the recorded tax liability is less than we expect the ultimate assessment to be. For a discussion of current tax matters, see "Note 13: Contingencies" in the Notes to Consolidated Condensed Financial Statements.

Results of Operations – First Quarter of 2004 Compared to First Quarter of 2003*Overview*

In the first quarter of 2004, we saw a substantial improvement in our Intel Architecture business compared to the first quarter of 2003, and as we look ahead to the rest of 2004, we are planning for growth in annual revenue made possible by an improved economic climate, and further progress in overall gross margin. We continue to be largely dependent on the success of our microprocessor business. Revenue from sales of microprocessors within our Intel Architecture business represented approximately 74% of our consolidated net revenue in the first quarter of 2004. Growth in sales and profitability depends on our ability to successfully ramp new products, and to obtain continuing benefits from the productive use of our manufacturing assets used for 90-nanometer process technology and 300mm wafers. During 2004, we plan to continue ramping our 90-nanometer desktop processor, code-named "Prescott," and 90-nanometer mobile processor, code named "Dothan." In ICG, our goal is to continue to streamline operations, and work towards profitability. Within ICG, our flash memory group benefited in the first quarter from our return to the broad market segment through our distribution channel. Growth within ICG is largely dependent on our securing design wins for new products and OEMs taking these product designs to production. In addition, our flash memory group is largely dependent on customer demand for higher density flash memory and continued end user adoption of new leading-edge cellular handsets. Our business relies on continued sales growth in emerging markets and continued business and consumer investment in technologies that use our products in mature markets.

As discussed in our "Strategy" section, the results of operations for our operating segments in this MD&A are presented under the new organizational structure. All prior period amounts have been restated to conform to the new presentation.

The following table sets forth certain consolidated statements of income data as a percentage of net revenue for the periods indicated:

	Q1 2004	Q1 2003
Net revenue	100.0%	100.0%
Cost of sales	39.8%	48.0%
Gross margin	60.2%	52.0%
Research and development	14.8%	15.1%
Marketing, general and administrative	14.1%	15.1%
Amortization of acquisition-related intangibles and costs	0.7%	1.2%
Operating income	30.6%	20.6%

The following table sets forth information on our geographic regions for the periods indicated:

(Dollars In Millions)	Q1 2004		Q1 2003	
	Revenue	% of Total	Revenue	% of Total
Americas	\$ 2,163	27%	\$ 1,924	29%
Asia-Pacific	3,284	40%	2,642	39%
Europe	1,927	24%	1,641	24%
Japan	717	9%	544	8%
Total	\$ 8,091	100%	\$ 6,751	100%

Our net revenue for Q1 2004 was \$8.1 billion, an increase of 20% compared to Q1 2003. This significant growth was primarily driven by strength in sales of microprocessors in our Intel Architecture business, accompanied by higher net revenue for ICG.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

All of our geographic regions experienced increased revenue in Q1 2004 compared to Q1 2003. Our Asia-Pacific region's revenue comprised the largest portion of our total revenue and increased 24%, reflecting growth in local consumption and Asia's continued growth as a global manufacturing and design center. Japan experienced substantial growth with an increase of 32%, Europe increased 17%, and the Americas region increased 12%. We experienced solid growth in both emerging and mature markets in Q1 2004 compared to Q1 2003.

Our overall gross margin percentage increased to 60.2% for Q1 2004 from 52.0% in Q1 2003. Total gross margin benefited from improved gross margin within the Intel Architecture business as well as a slight shift in the total company revenue mix to the higher-margin Intel Architecture business. These improvements were partially offset by lower gross margin in ICG. See "Business Outlook" for a discussion of gross margin expectations.

Intel Architecture Business

The revenue and operating income for the Intel Architecture operating segment for the first quarter of 2004 and 2003 were as follows:

<u>(In Millions)</u>	<u>Q1 2004</u>	<u>Q1 2003</u>
Microprocessor revenue	\$ 5,980	\$ 4,860
Chipset, motherboard and other revenue	1,045	912
Total revenue	\$ 7,025	\$ 5,772
Operating income	\$ 3,015	\$ 1,908

Net revenue for the Intel Architecture operating segment increased \$1.3 billion, or 22%, in Q1 2004 compared to Q1 2003. Revenue from sales of microprocessors increased 23% while revenue from sales of chipsets, motherboards and other increased 15%. The increase in revenue was primarily due to significantly higher unit sales of microprocessors in Q1 2004, and to a lesser extent, higher average selling prices of microprocessors.

Operating income increased \$1.1 billion, or 58%, in Q1 2004 compared to Q1 2003. The increase was primarily due to the impact of higher revenue and lower unit costs for microprocessors. These increases were partially offset by a \$162 million charge in Q1 2004 relating to a settlement agreement with Intergraph Corporation. In addition, Q1 2003 benefited from the unusually high level of sales of microprocessor and chipset inventory that had been previously reserved.

Intel Communications Group

The revenue and operating loss for the ICG operating segment for the first quarter of 2004 and 2003 were as follows:

<u>(In Millions)</u>	<u>Q1 2004</u>	<u>Q1 2003</u>
Revenue	\$ 1,065	\$ 963
Operating loss	\$ (219)	\$ (218)

Net revenue increased by \$102 million, or 11%, in Q1 2004 compared to Q1 2003 primarily due to higher revenue from sales of embedded processing components and wireless connectivity products, including the wireless components for our Intel Centrino mobile technology. These increases in revenue were partially offset by lower revenue from sales of cellular baseband chipsets. In addition, in Q1 2004, revenue for flash memory products increased to \$417 million from \$409 million in Q1 2003.

The operating loss remained relatively flat at \$219 million in Q1 2004, compared to \$218 million in Q1 2003. Higher revenue and lower operating expenses in Q1 2004 were offset by higher costs for flash memory products as we sold higher density products. In addition, the impact of higher inventory write-offs primarily for certain applications and cellular processors offset the improvements in our operating results.

Operating Expenses

Operating expenses for the first quarter of 2004 and 2003 were as follows:

(In Millions)	Q1 2004	Q1 2003
Research and development	\$ 1,195	\$ 1,019
Marketing, general and administrative	\$ 1,141	\$ 1,018
Amortization of acquisition-related intangibles and costs	\$ 58	\$ 84

Research and development spending increased \$176 million, or 17%, compared to Q1 2003. This increase was primarily due to higher expenses related to development for manufacturing process technologies, including the 65-nanometer process on 300-millimeter wafers and higher expenses for product development programs in the Intel Architecture business, as well as higher profit-dependent compensation expenses. Marketing, general and administrative expenses were up \$123 million, or 12%, compared to Q1 2003 primarily due to higher cooperative advertising expenses, as a result of higher revenue in our Intel Architecture business, and increased profit-dependent bonus expenses. Research and development along with marketing, general and administrative expenses were 29% of net revenue in Q1 2004 and 30% of net revenue in Q1 2003.

Amortization of acquisition-related intangibles and costs was \$58 million in Q1 2004 compared to \$84 million in Q1 2003, as a portion of the intangibles related to prior acquisitions became fully amortized.

Gains (Losses) on Equity Securities, Interest and Other, and Taxes

Gains (losses) on equity securities, net, interest and other, net and taxes for the first quarter of 2004 and 2003 were as follows:

(In Millions)	Q1 2004	Q1 2003
Gains (losses) on equity securities, net	\$ 19	\$ (127)
Interest and other, net	\$ 49	\$ 52
Provision for taxes	\$ 814	\$ 401

Gains (losses) on equity securities and certain equity derivatives for Q1 2004 was a net gain of \$19 million compared to a net loss of \$127 million for Q1 2003. The increase in Q1 2004 was primarily attributed to lower impairment charges on non-marketable equity securities (approximately \$11 million in Q1 2004 and \$140 million in Q1 2003). The net gain in Q1 2004 was also a result of higher gains on equity transactions.

Our effective income tax rate was 32.0% for Q1 2004, compared to 30.5% for Q1 2003. The rate for 2004 is higher than the rate in the prior year primarily due to a higher percentage of profits being expected in higher-tax jurisdictions.

Financial Condition

Our financial condition remains strong. At March 27, 2004, cash, short-term investments and fixed income instruments included in trading assets totaled \$15.4 billion, down from \$15.9 billion at December 27, 2003. Total short-term and long-term debt was \$1.2 billion and represented 3% of stockholders' equity at both March 27, 2004, and December 27, 2003.

For the first quarter of 2004, cash provided by operating activities was \$1.8 billion (\$1.7 billion for the first quarter of 2003). Cash was provided by net income adjusted for non-cash related items. Working capital uses of cash included increases in accounts receivable and inventories and decreases in accrued compensation and benefits and income taxes payable. Accounts receivable increased over December 2003 levels, primarily due to a higher proportion of sales occurring toward the end of the current quarter. The days sales outstanding remained the same at 36 days. Our three largest customers accounted for approximately 40% of net revenue for the first quarter of 2004, with one of these customers accounting for approximately 18% of revenue and another customer accounting for approximately 15%. For the first quarter of 2003, our three largest customers accounted for approximately 40% of net revenue. Additionally, those three largest customers accounted for approximately 43% of net accounts receivable at March 27, 2004 and December 27, 2003. Our inventory levels were higher by 11% at the end of the first quarter of 2004 compared to December 2003 as yields improved and we ramped new products for sale in 2004. Accrued compensation and benefits decreased during the quarter as we paid year-end bonuses and made the annual cash contributions to our profit sharing plans. The decrease in the accrual for income taxes payable is due to higher tax payments in the first quarter of 2004.

We used \$929 million in net cash for investing activities during the first quarter of 2004, compared to \$927 million during the first quarter of 2003. Improved corporate credit profiles facilitated a slight shift in our portfolio of investments in debt securities to longer term maturities. Capital expenditures decreased to \$680 million in the first quarter of 2004 from \$954 million in the first quarter of 2003. We continued to invest in capital equipment and construction, primarily for additional microprocessor manufacturing capacity, but at a lower rate than in the same period for the prior year.

We used \$1.3 billion in net cash for financing activities in the first quarter of 2004, compared to \$1.1 billion in the first quarter of 2003. The major financing use of cash was for the repurchase of shares as we repurchased 49.2 million shares of common stock for \$1.5 billion compared to 62.6 million shares for \$1.0 billion in the same period in 2003. As of March 27, 2004, approximately 365 million shares remained available for repurchase under the existing repurchase authorization.

Additional financing uses of cash in the first quarter of 2004 included payments of dividends. In January 2004, our Board of Directors approved an increase in the quarterly cash dividend from \$0.02 per share to \$0.04 per share, effective for the first-quarter 2004 dividend. Therefore, our dividend payments were \$259 million in the first quarter of 2004, higher than the \$131 million paid in the same period of the prior year. Financing sources of cash during the first quarter of 2004 were primarily \$386 million in proceeds from the sale of shares pursuant to employee stock plans (\$233 million during the first quarter of 2003).

Another potential source of liquidity is authorized borrowings, including commercial paper, of \$3.0 billion. There were no borrowings under our commercial paper program during the first quarter of 2004. We also maintain the ability to offer an aggregate of approximately \$1.4 billion in debt, equity and other securities under U.S. Securities and Exchange Commission (SEC) shelf registration statements.

We believe that we have the financial resources needed to meet our business requirements for the next twelve months, including capital expenditures for the expansion or upgrading of worldwide manufacturing and assembly and test capacity, working capital requirements, the dividend program, potential stock repurchases and potential future acquisitions or strategic investments.

Employee Stock Options

Our stock option program is a broad-based, long-term retention program that is intended to attract and retain talented employees and align stockholder and employee interests. The program currently consists of two plans: one under which officers, key employees and non-employee directors may be granted options to purchase shares of our stock, and a broad-based plan under which options may be granted to all employees other than officers and directors. Substantially all of our employees participate in one of the plans. Options granted by the company expire no later than 10 years from the grant date. Options granted to existing and newly hired employees generally vest in increments over four or five years from the date of grant, and certain grants to key employees have delayed vesting generally beginning six years from the date of grant. Our 1984 Stock Option Plan, as amended, expires in May 2004, and our 1997 Stock Option Plan, as amended, expires in January 2007. We are presently proposing a new equity incentive plan for stockholder vote at our May 2004 Annual Stockholders' Meeting. Contingent on stockholder approval, this new equity incentive plan would replace both the expiring 1984 Plan and the 1997 Plan, which would be terminated early.

We have a goal to keep the potential incremental dilution related to our option program to a long-term average of less than 2% annually. The dilution percentage is calculated using the new option grants for the year, net of options forfeited by employees leaving the company and options expired, divided by the total outstanding shares at the beginning of the year.

Options granted to employees, including officers, and non-employee directors from 2000 through the first quarter of 2004 are summarized as follows:

(Shares in Millions)	YTD 2004	2003	2002	2001	2000
Total options granted ¹	4	110	174	238	163
Less options forfeited ¹	(7)	(40)	(44)	(47)	(31)
Net options granted (forfeited)	(3)	70	130	191	132
Net grants as % of outstanding shares ²	n/m	1.1%	1.9%	2.8%	2.0%
Grants to listed officers ³ as % of total options granted	—	2.4%	1.7%	0.8%	0.4%
Grants to listed officers as % of outstanding shares	—	<0.1%	<0.1%	<0.1%	<0.1%
Cumulative options held by listed officers as % of total options outstanding	2.1%	2.1%	2.1%	2.0%	2.4%

¹Excluding options assumed in connection with acquisitions.

²Outstanding shares as of the beginning of each period.

³"Listed officers" for 2004 are those listed in our proxy statement dated March 31, 2004, defined as our Chief Executive Officer and each of the four other most highly compensated executive officers.

In accordance with a policy established by the Compensation Committee of the Board of Directors, total options granted to the listed officers may not exceed 5% of total options granted in any year. No options were granted to listed officers in the first quarter of 2004. All stock option grants are made after a review by, and with the approval of, the Compensation Committee. All members of the Compensation Committee are independent directors, as defined in the applicable rules for issuers traded on The NASDAQ Stock Market.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

For additional information regarding stock option plans and plan activity for the first quarter of 2004 and for 2003, see "Note 2: Employee Stock Benefit Plans" in the Notes to the Consolidated Condensed Financial Statements in this quarterly report. Information regarding our stock option plans should be read in connection with the information appearing under the heading "Report of the Compensation Committee on Executive Compensation" in our 2004 Proxy Statement.

In-the-money and out-of-the-money¹ option information for total options outstanding as of March 27, 2004 was as follows:

(Shares in Millions)	Exercisable		Unexercisable		Total	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
In-the-money	258.5	\$ 16.14	333.8	\$ 21.12	592.3	\$ 18.95
Out-of-the-money	59.4	\$ 43.65	178.6	\$ 42.60	238.0	\$ 42.86
Total options outstanding	317.9	\$ 21.29	512.4	\$ 28.61	830.3	\$ 25.80

¹Out-of-the-money options have an exercise price equal to or above \$27.38, the closing price of Intel stock on March 27, 2004 as reported on The NASDAQ Stock Market.

Option exercises for the first quarter of 2004 and option values for listed officers as a group as of March 27, 2004 were as follows:

Shares Acquired on Exercise	Value Realized	Number of Shares Underlying Unexercised Options at March 27, 2004		Values of Unexercised In-the-Money Options at March 27, 2004 ¹	
		Exercisable	Unexercisable	Exercisable	Unexercisable
576,000	\$16,024,000	7,787,400	9,820,800	\$108,850,000	\$49,564,400

¹These amounts represent the difference between the exercise price and \$27.38, the closing price of Intel stock on March 27, 2004 as reported on The NASDAQ Stock Market, for all in-the-money options held by the listed officers.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Information as of March 27, 2004 regarding equity compensation plans approved and not approved by stockholders is summarized in the following table (shares in millions):

Plan Category	(A) Number of Shares to be Issued Upon Exercise of Outstanding Options	(B) Weighted-Average Exercise Price of Outstanding Options	(C) Number of Shares Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Shares Reflected in Column A)
Equity compensation plans approved by stockholders	156.2	\$ 16.78	223.1 ¹
Equity compensation plans not approved by stockholders	665.9	\$ 28.02	383.5 ²
Total	822.1³	\$ 25.89	606.6

¹ Includes 146.7 million shares available for future issuance under our 1984 Stock Option Plan, as amended, generally used for grants to officers and directors. Also includes 76.4 million shares available under our 1976 Employee Stock Participation Plan.

² Shares available under our 1997 Stock Option Plan, used for grants to employees other than officers and directors. Any new plans, and any material amendments to existing plans, will be submitted for stockholder approval under the rules of the NASDAQ Stock Market.

³ Total excludes 8.2 million shares issuable under outstanding options, with a weighted average exercise price of \$16.72, originally granted under plans we assumed in connection with acquisitions. We do not intend to grant any further options under these plans.

Business Outlook

As we look ahead to the rest of 2004, we are planning for growth in annual revenue made possible by an improved economic climate, and further progress in gross margin. For the second quarter of 2004, we expect revenue to be between \$7.6 billion and \$8.2 billion, compared to first quarter revenue of \$8.1 billion. The midpoint of this range would be a sequential decline of slightly more than 2%, which is consistent with the average pattern for what tends to be our most variable quarter. The outlook for the communications industry continues to be soft. In this environment, revenue growth for our networking and communications business is largely dependent on our securing design wins for new products, OEMs taking those product designs to production and continued use of those product designs by OEMs. Demand for our flash memory products is uncertain in the highly competitive cellular handset market segment. Revenue growth for our flash memory products is largely dependent on customer demand for higher density flash memory and continued end user adoption of new leading-edge cellular handsets.

Our financial results are substantially dependent on sales of microprocessors and related components by the Intel Architecture operating segment. Revenue is partly a function of the mix of microprocessor types and speeds sold as well as the mix of related chipsets and motherboards, all of which are difficult to forecast. Because of the wide price differences among desktop, mobile and server microprocessors, the mix of types and speeds of microprocessors sold affects the average selling price that we will realize and has a large impact on our revenue and gross margin. Microprocessor revenue is also dependent on the availability of other parts of the system platform, including chipsets, motherboards, operating system software and application software. Revenue is also affected by our sales of other semiconductor and non-semiconductor products and is subject to the impact of economic conditions in various geographic regions.

We expect the gross margin percentage in the second quarter of 2004 to be approximately 60%, plus or minus a couple of points, flat compared to 60.2% in the first quarter, which includes the charge for the settlement agreement with Intergraph Corporation. In addition, the second quarter of 2004 is expected to have lower revenue and increased start-up costs compared to the first quarter. For the full year of 2004, our gross margin is expected to be 62%, plus or minus a few points. Our gross margin should benefit from the productive use of 90-nanometer technology and 300mm wafers, as we build more of our mainstream products with these technologies. Our gross margin varies primarily with revenue levels, which are dependent on unit volumes and prices, as well as the mix of types and speeds of processors sold, and the mix of microprocessors, related chipsets and motherboards, and other semiconductor and non-semiconductor products. Variability of other factors will also continue to affect cost of sales and the gross margin percentage, including unit costs and yield issues associated with production at our factories, timing and execution of the manufacturing ramp including the ramp of the 90-nanometer process technology on 300mm wafers, excess of manufacturing capacity, the reusability of factory equipment, impairment of manufacturing or assembly and test assets, excess inventory, inventory obsolescence and variations in inventory valuation.

We have significantly expanded our semiconductor manufacturing and assembly and test capacity over the last few years, and we continue to plan capacity based on the assumed continued success of our overall strategy and the acceptance of our products in specific market segments. We currently expect that capital spending will be between \$3.6 billion and \$4.0 billion in 2004, compared to \$3.7 billion in 2003. The midpoint of this range, \$3.8 billion, is only slightly higher than 2003. This capital-spending plan is dependent on expectations regarding production efficiencies and delivery times of various machinery and equipment, and construction schedules for new facilities. If the demand for our products does not grow and continue to move toward higher performance products in the various market segments, revenue and gross margin would be adversely affected and manufacturing and/or assembly and test capacity would be under-utilized, and the rate of capital spending could be further reduced. We could be required to record an impairment of our manufacturing or assembly and test equipment and/or facilities, or factory planning decisions may cause us to record accelerated depreciation. However, in the long term, revenue and gross margin may also be affected if we do not add capacity fast enough to meet market demand.

We expect depreciation expense to be between \$1.1 billion and \$1.2 billion for the second quarter of 2004 and \$4.6 billion for the full year 2004.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

Spending on research and development, plus marketing, general and administrative expenses in the second quarter of 2004 is expected to be approximately \$2.4 billion, slightly higher than the first quarter primarily due to annual wage increases that took effect on April 1, 2004. Expenses, particularly certain marketing and compensation-related expenses, may vary from this expectation, depending in part on the level of revenue and profits.

Research and development spending is expected to be approximately \$4.8 billion in 2004.

Based on acquisitions completed through April 28, 2004, we expect amortization of acquisition-related intangibles and costs to be approximately \$40 million in the second quarter and \$170 million for the full year 2004. We review our acquisition-related intangible assets for impairment whenever indicators of potential impairment exist.

We expect the net gains from equity securities and interest and other for the second quarter of 2004 to be approximately \$60 million. This is primarily due to an expected net gain on equity securities of approximately \$20 million as well as expected net interest income. Our expectations for gains (losses) from equity securities include impairment charges on private equity investments. This expectation for impairments in the second quarter is based on our experience and it is not possible to know at the present time which specific investments are likely to be impaired or the extent or timing of individual impairments. In addition, our expectations for gains or losses from equity securities and interest and other assume no unanticipated events and vary depending on equity market levels and volatility, gains or losses realized on the sale or exchange of securities, interest rates, cash balances, and changes in the fair value of derivative instruments.

At March 27, 2004, we held non-marketable equity securities with a carrying value of \$661 million. If the level of IPO market activity does not increase and the availability of venture capital funding for technology investments does not improve, our non-marketable investments may be adversely affected. As companies within our portfolio attempt to raise additional funds, the funds may not be available to them or they may receive lower valuations, with less favorable investment terms than in previous financings, and our investments would likely become impaired. However, we are not able to determine at the present time which specific investments are likely to be impaired in the future, or the extent or timing of individual impairments.

We currently expect our effective tax rate for 2004 to be approximately 32%. The estimated effective tax rate is based on current tax law and the current expected income, and assumes the company continues to receive the tax benefit for export sales (see "Note 13: Contingencies" in Notes to Consolidated Condensed Financial Statements). The tax rate may be affected by the closing of acquisitions or divestitures, the jurisdictions in which profits are determined to be earned and taxed, and the ability to realize deferred tax assets.

As of March 27, 2004, we have approximately \$3.7 billion of goodwill remaining on our balance sheet, of which \$3.2 billion is related to the ICG operating segment and \$533 million is related to the Intel Architecture operating segment. Specifically for ICG, if we fail to deliver new products, if the products fail to gain expected market acceptance, or if market conditions in the communications business fail to improve, our revenue and cost forecasts may not be achieved and we may incur additional charges for impairment of goodwill.

We are currently a party to various legal proceedings and claims, including claims related to taxes. Management does not believe that the ultimate outcome of these legal proceedings and claims will have a material adverse effect on our financial position or overall trends in results of operations. However, litigation is subject to inherent uncertainties and unfavorable rulings could occur. An unfavorable ruling could include monetary damages, additional taxes owed or, in cases where injunctive relief is sought, an injunction prohibiting Intel from selling one or more products. If an unfavorable ruling were to occur in any specific period, there exists the possibility of a material adverse impact on the results of operations of that period or future periods. Management believes that, given our current liquidity and cash and investment balances, even an adverse judgment would not have a material impact on cash and investments or liquidity.

We operate globally, with sales offices and research and development as well as manufacturing and assembly and test facilities in many countries, and, as a result, we are subject to risks and factors associated with doing business outside the U.S. Global operations involve inherent risks that include currency controls and fluctuations, tariff and import regulations,

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Continued)

and regulatory requirements that may limit our or our customers' ability to manufacture, assemble and test, design, develop or sell products in particular countries. If terrorist activity, armed conflict, civil or military unrest, or political instability occurs in the U. S., Israel or other locations, such events may disrupt manufacturing, assembly and test, logistics, security and communications, and could also result in reduced demand for Intel's products. The impacts of major health concerns, or of large-scale outages or interruptions of service from utility or other infrastructure providers, on Intel, its suppliers, customers or other third parties could also adversely affect our business and impact customer order patterns. We could also be affected if labor issues disrupt our transportation arrangements or those of our customers or suppliers. On a worldwide basis, we regularly review our key infrastructure, systems, services and suppliers, both internally and externally, to seek to identify significant vulnerabilities as well as areas of potential business impact if a disruptive event were to occur. Once identified, we assess the risks, and as we consider it to be appropriate, we initiate actions intended to reduce the risks and their potential impact. However, there can be no assurance that we have identified all significant risks or that we can mitigate all identified risks with reasonable effort.

Our future results of operations and the other forward-looking statements contained in this filing, including this MD&A, involve a number of risks and uncertainties—in particular, the statements regarding our goals and strategies, new product introductions, plans to cultivate new businesses, market segment share and growth rate assumptions, future economic conditions and recovery in the communications businesses, revenue, pricing, gross margin and costs, capital spending, depreciation and amortization, research and development expenses, potential impairment of investments, the tax rate and pending tax and legal proceedings. In addition to various factors that we have discussed above, a number of other factors could cause actual results to differ materially from our expectations. Demand for our products, which impacts our revenue and gross margin percentage, is affected by business and economic conditions, as well as computing and communications industry trends and the development and timing of introduction of compelling software applications and operating systems that take advantage of the features of our products. Demand for our products is also affected by changes in customer order patterns, such as changes in the levels of inventory maintained by our customers and the timing of customer purchases. Revenue and gross margin could also be affected by competitive factors, such as competing chip architectures and manufacturing technologies, competing software-compatible microprocessors, pricing pressures and other competitive factors, as well as market acceptance of our new products in specific market segments, the availability of sufficient inventory to meet demand and the availability of externally purchased components or materials. Our future revenue is also dependent on continuing technological advancement, including developing and implementing new processes and strategic products, as well as the timing of new product introductions, sustaining and growing new businesses, and integrating and operating any acquired businesses. Our results could also be affected by adverse effects associated with product defects and errata (deviations from published specifications) and by litigation involving intellectual property, stockholder, consumer and other issues.

We believe that we have the product offerings, facilities, personnel, and competitive and financial resources for continued business success, but future revenue, costs, margins and profits are all influenced by a number of factors, including those discussed above, all of which are inherently difficult to forecast.

Status of Business Outlook and Scheduled Business Update

We expect that our corporate representatives will from time to time meet privately with investors, investment analysts, the media and others, and may reiterate the forward-looking statements contained in the "Business Outlook" section and elsewhere in this Form 10-Q, including any such statements that are incorporated by reference in this Form 10-Q. At the same time, we will keep this Form 10-Q and our then current Business Outlook publicly available on our Investor Relations web site (www.intc.com). The public can continue to rely on the Business Outlook published on the web site as representing our current expectations on matters covered, unless we publish a notice stating otherwise. The statements in Business Outlook and other forward-looking statements in this Form 10-Q are subject to revision during the course of the year in our quarterly earnings releases and SEC filings, our mid-quarter business updates and at other times.

We intend to publish a Mid-Quarter Business Update on June 3, 2004. From the close of business on May 28, 2004 until publication of the Update, we will observe a "Quiet Period" during which the Business Outlook and other forward-looking statements published in our earnings press releases on January 14, 2004 and April 13, 2004, as reiterated or updated, as applicable, in our filings with the SEC on Forms 10-K and 10-Q, should be considered historical, speaking as of prior to the Quiet Period only and not subject to update. During the Quiet Period, our representatives will not comment on the Business Outlook or our financial results or expectations.

A Quiet Period operating in similar fashion with regard to the Business Outlook and our SEC filings will begin at the close of business on June 11, 2004 and will extend until the day when our next quarterly Earnings Release is published, presently scheduled for July 13, 2004.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information in this section should be read in connection with the information on financial market risk related to changes in interest rates and non-U.S. currency exchange rates in Part II, Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in our Annual Report on Form 10-K for the year ended December 27, 2003.

We have a portfolio of equity investments that includes marketable strategic equity securities, trading assets and equity derivative instruments such as warrants and options, as well as non-marketable equity investments. We invest in companies that develop software, hardware and other technologies or provide services supporting strategic technologies. This strategic investment program helps advance our overall mission to be the preeminent building block supplier to the worldwide Internet economy. Our current investment focus areas include: enabling mobile and Internet client devices, helping to create the digital home, advancing high-performance communications infrastructure and developing the next generation of silicon production technologies. Our focus areas tend to develop and change over time due to rapid advancements in the technology field.

To the extent that our marketable portfolio of investments continues to have strategic value, we typically do not attempt to reduce or eliminate our market exposure. For those securities that we no longer consider strategic, we evaluate market and economic factors in our decision on the timing of disposal and whether it is possible and appropriate to hedge the equity market risk prior to sale. As of March 27, 2004, the fair value of our portfolio of marketable equity investments and equity derivative instruments, including hedging positions, was \$627 million.

To assess the market price sensitivity of our marketable portfolio, we analyzed the historical movements over the past several years of high-technology stock indices that we considered appropriate. Based on the analysis of these indices, we estimated that it was reasonably possible that the prices of the stocks in our portfolio could experience a 30% adverse change in the near term. However, our marketable portfolio is substantially concentrated in one company, which will affect the marketable portfolio's price volatility. We currently have an investment in Micron Technology, Inc. with carrying value of approximately \$539 million, or 86% of the total value of the marketable portfolio including equity derivative instruments at March 27, 2004. The investment in Micron is part of our strategy to support the development and supply of DRAM products. We analyzed the historical volatility of Micron's stock, and if the stock behaves with the same price volatility that it has in the past, we could experience a 60% loss.

The table below presents the fair value and hypothetical loss for our marketable portfolio given the specified percentage decreases in equity prices. The estimated decreases reflect the impact of hedges and offsetting positions, and are not necessarily indicative of future performance. Actual results may differ materially.

(In Millions)	Fair Value	Hypothetical Loss	
		30% Decrease	60% Decrease
March 27, 2004	\$ 627	\$ (194)	\$ (383)
December 27, 2003	\$ 591	\$ (161)	\$ (318)

Our strategic investments in non-marketable equity securities would also be affected by an adverse movement of equity market prices, although the impact cannot be directly quantified. Such a movement and the related underlying economic conditions would negatively affect the prospects of the companies we invest in, their ability to raise additional capital and the likelihood of our being able to realize our investments through liquidity events such as initial public offerings, mergers and private sales. These types of investments involve a great deal of risk, and there can be no assurance that any specific company will grow or will become successful; consequently, we could lose all or part of our investment. At March 27, 2004, our strategic investments in non-marketable equity securities had a carrying amount of \$661 million that were subject to mark-to-market requirements.

ITEM 4. CONTROLS AND PROCEDURES

Quarterly Controls Evaluation and Related CEO and CFO Certifications

We conducted an evaluation of the effectiveness of the design and operation of our “disclosure controls and procedures” (Disclosure Controls) as of the end of the period covered by this Quarterly Report. The controls evaluation was done under the supervision and with the participation of management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO).

Attached as exhibits to this Quarterly Report are certifications of the CEO and the CFO, which are required in accordance with Rule 13a-14 of the Exchange Act. This “Controls and Procedures” section includes the information concerning the controls evaluation referred to in the certifications, and it should be read in conjunction with the certifications for a more complete understanding of the topics presented.

Definition of Disclosure Controls

Disclosure Controls are controls and procedures designed to reasonably assure that information required to be disclosed in our reports filed under the Exchange Act, such as this Quarterly Report, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms. Disclosure Controls are also designed to reasonably assure that such information is accumulated and communicated to our management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. Our Disclosure Controls include components of our internal control over financial reporting, which consists of control processes designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles in the U.S. To the extent that components of our internal control over financial reporting are included within our Disclosure Controls, they are included in the scope of our quarterly controls evaluation.

Limitations on the Effectiveness of Controls

The company’s management, including the CEO and CFO, does not expect that our Disclosure Controls or our internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system’s objectives will be met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Scope of the Controls Evaluation

The evaluation of our Disclosure Controls included a review of the controls' objectives and design, the company's implementation of the controls and the effect of the controls on the information generated for use in this Quarterly Report. In the course of the controls evaluation, we sought to identify data errors, control problems or acts of fraud and confirm that appropriate corrective action, including process improvements, were being undertaken. This type of evaluation is performed on a quarterly basis so that the conclusions of management, including the CEO and CFO, concerning the effectiveness of the controls can be reported in our Quarterly Reports on Form 10-Q and to supplement our disclosures made in our Annual Report on Form 10-K. Many of the components of our Disclosure Controls are also evaluated on an ongoing basis by our Internal Audit Department and by other personnel in our Finance organization. The overall goals of these various evaluation activities are to monitor our Disclosure Controls, and to modify them as necessary. Our intent is to maintain the Disclosure Controls as dynamic systems that change as conditions warrant.

Conclusions

Based upon the controls evaluation, our CEO and CFO have concluded that, subject to the limitations noted above, as of the end of the period covered by this Quarterly Report, our Disclosure Controls were effective to provide reasonable assurance that material information relating to Intel and its consolidated subsidiaries is made known to management, including the CEO and CFO, particularly during the period when our periodic reports are being prepared.

ITEM 1. LEGAL PROCEEDINGS

Tax Matters

In August 2003, in connection with the Internal Revenue Service (IRS) regular examination of Intel's tax returns for the years 1999 and 2000, the IRS proposed certain adjustments to the amounts reflected by Intel on these returns as a tax benefit for its export sales. If the IRS issues formal assessments consistent with the notices and ultimately prevails in its position, Intel's federal income tax liability for these years would increase by approximately \$600 million, plus interest. The IRS may make similar claims for years subsequent to 2000 in future audits.

Intel disputes the proposed adjustments and intends to pursue this matter through applicable IRS and judicial procedures, as appropriate. Although the final resolution of the proposed adjustments is uncertain, based on currently available information, management believes that the ultimate outcome will not have a material adverse effect on the company's financial position, cash flows or overall trends in results of operations. In the event of an unfavorable resolution, there exists the possibility of a material adverse impact on the results of operations of the period in which the matter is ultimately resolved, or an unfavorable outcome becomes probable and reasonably estimable.

Litigation

Intel currently is a party to various legal proceedings, including those noted below. While management presently believes that the ultimate outcome of these proceedings, individually and in the aggregate, will not have a material adverse effect on our financial position or overall trends in results of operations, litigation is subject to inherent uncertainties, and unfavorable rulings could occur. An unfavorable ruling could include money damages or, in cases for which injunctive relief is sought, an injunction prohibiting Intel from selling one or more products. Were an unfavorable ruling to occur, there exists the possibility of a material adverse impact on the net income of the period in which the ruling occurs or future periods.

Intergraph Corporation v. Intel
U.S. District Court, Northern District of Alabama, Northeastern Division
U.S. District Court, Eastern District of Texas

In 1997, Intergraph Corporation filed suit in Federal District Court in Alabama, generally alleging, among other claims, that Intel infringed certain Intergraph patents. In August 2001, Intergraph filed a second suit in the U.S. District Court for the Eastern District of Texas, alleging that Intel infringed additional Intergraph patents, and seeking an injunction and unspecified damages. In 2002, Intel and Intergraph entered into a settlement agreement, pursuant to which they agreed to settle the Alabama lawsuit and dismiss it with prejudice.

Under the 2002 settlement agreement, if the patents in the Texas case were found to be infringed, Intel would pay Intergraph \$150 million. If Intergraph prevailed on either patent on appeal, the 2002 settlement agreement provided that Intel would pay Intergraph an additional \$100 million and receive a license for the patents at issue in the case. In 2002, the Texas District Court ruled that Intel infringed both patents at issue in that case. Pursuant to the 2002 settlement agreement, Intel paid Intergraph \$150 million. Intel then appealed the decision. In February 2004, the Court of Appeals for the Federal Circuit found that the District Court erred, and remanded the case to the District Court to determine in the first instance whether the patents at issue had been infringed.

LEGAL PROCEEDINGS (Continued)

In March 2004, Intel and Intergraph entered into a second settlement agreement, pursuant to which they agreed to settle the Texas lawsuit, and Intergraph agreed to dismiss Intergraph's separate pending litigation against Dell Inc. Both cases were dismissed with prejudice. Pursuant to the 2004 settlement agreement, Intel will pay Intergraph a total of \$225 million. Intel paid \$125 million by April 5, 2004 and will pay \$25 million in each of the following four quarters. Also pursuant to the 2004 settlement agreement, Intergraph granted Dell a license under patents filed prior to April 4, 2012 to sell Dell products, including Dell computer systems that contain Intel microprocessors. The 2004 settlement agreement further provided that Intergraph is entitled to retain the \$150 million previously paid by Intel pursuant to the 2002 settlement agreement, but that no additional \$100 million payment would be required under the 2002 settlement agreement. The 2004 settlement agreement also includes additional license rights in favor of Intel and Intel's customers and a covenant by Intergraph not to sue any Intel customer for products that include Intel microprocessors, Intel chipsets and Intel motherboards in combination.

Intergraph Corporation v. Dell Inc., et al.
U.S. District Court, Eastern District of Texas

In December 2002, Intergraph filed suit in the Eastern District of Texas against Dell Inc., Gateway Inc. and Hewlett-Packard Company, alleging infringement of three of Intergraph's patents. These three patents are a subset of the patents that were the subject of a now settled lawsuit that Intergraph had filed against Intel in Alabama. In May 2003, Dell filed its answer and counterclaim and named Intel as well as Intergraph in a counterclaim for declaratory judgment.

In March 2004, Intel and Intergraph entered into a settlement agreement, pursuant to which they agreed to settle this lawsuit, as well as a separate pending lawsuit brought by Intergraph against Intel, and dismiss both cases with prejudice. Pursuant to the settlement agreement, Intergraph granted Dell a license to certain Intergraph patents.

MicroUnity, Inc. v. Intel Corporation, et al.
U.S. District Court, Eastern District of Texas

In March 2004, MicroUnity filed suit in the Eastern District of Texas against Intel and Dell Inc. MicroUnity claims that certain of Intel microprocessors infringe six MicroUnity patents, and that certain Intel chipsets infringe one MicroUnity patent. MicroUnity also alleges that Dell products incorporating these Intel products also infringe the MicroUnity patents. MicroUnity seeks an injunction, unspecified damages, and attorneys' fees. Intel disputes MicroUnity's claims and intends to defend the lawsuit vigorously.

Barbara Sales, et al. v. Intel Corporation, Gateway Inc., Hewlett-Packard Co. and HPDirect, Inc.
(formerly Deanna Neubauer, et al v. Intel Corporation, Gateway Inc., Hewlett-Packard Co. and HPDirect, Inc.)
Third Judicial Circuit Court, Madison County, Illinois

In June 2002, various plaintiffs filed a lawsuit in the Third Judicial Circuit Court, Madison County, Illinois, against Intel, Hewlett-Packard Company, HPDirect, Inc. and Gateway Inc., alleging that the defendants' advertisements and statements misled the public by suppressing and concealing the alleged material fact that systems that use the Intel Pentium 4 processor are less powerful and slower than systems using the Intel Pentium III processor and a competitor's processors. The plaintiffs claim that their lawsuit should be treated as a nationwide class action. The plaintiffs seek unspecified damages, and attorneys' fees and costs. The company disputes the plaintiffs' claims and intends to defend the lawsuit vigorously.

ITEM 2. CHANGES IN SECURITIES, USE OF PROCEEDS AND ISSUER PURCHASES OF EQUITY SECURITIES**Issuer Purchases of Equity Securities**

<u>(Shares In Millions)</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans</u>	<u>Maximum Number of Shares that May Yet Be Purchased Under the Plans</u>
December 28, 2003–January 24, 2004	2.2	\$ 32.71	2.2	411.8
January 25, 2004–February 21, 2004	32.7	\$ 31.00	32.7	379.1
February 22, 2004–March 27, 2004	14.3	\$ 29.15	14.3	364.8
Total	49.2	\$ 30.54	49.2	

The company has an ongoing authorization, as amended, from the Board of Directors to repurchase shares of Intel's common stock in the open market or in negotiated transactions. The company's authorization is for up to 2.3 billion shares, which includes the most recent authorization in November 2002 to purchase an additional 480 million shares. We generally do not purchase stock during the quiet periods we have established in advance of the publication of our quarterly Earnings Release and Business Update release.

ITEM 5. OTHER INFORMATION

- On January 21, 2004, the Board of Directors approved an amendment to Intel's bylaws to increase the number of authorized directors from 12 to 13. This increase created a vacancy which was filled by the Board's appointment of Charlene Barshefsky to the Board of Directors on January 21, 2004. The Board's action in amending the Bylaws also provides that the number of authorized directors will decrease back to 11 when Winston H. Chen and Charles E. Young retire from the Board in May 2004.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K**(a) Exhibits**

- 3.2 Intel Corporation Bylaws as amended.
- 12.1 Statement Setting Forth the Computation of Ratios of Earnings to Fixed Charges.
- 31.1 Certification of Chief Executive Officer Pursuant to Rule 13a-14(a) of the Exchange Act.
- 31.2 Certification of Chief Financial Officer and Principal Accounting Officer Pursuant to Rule 13a-14(a) of the Exchange Act.
- 32.1 Certification of Chief Executive Officer and Chief Financial Officer and Principal Accounting Officer Pursuant to Rule 13a-14(b) of the Exchange Act and 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

(b) Reports on Form 8-K

- 1. On January 14, 2004, Intel furnished a report on Form 8-K relating to its financial information for the quarter ended December 27, 2003 and forward-looking statements relating to 2004 and the first quarter of 2004, as presented in a press release of January 14, 2004.
- 2. On March 4, 2004, Intel furnished a report on Form 8-K relating to an announcement regarding an update to forward-looking statements relating to 2004 and the first quarter of 2004, as presented in a press release of March 4, 2004.

Intel, the Intel Logo, Intel Inside, Celeron, Intel Centrino, Intel Xeon, Intel XScale, Intel StrataFlash, Itanium and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries. *Other names and brands may be claimed as the property of others.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

INTEL CORPORATION

BYLAWS

ARTICLE I

Offices

Section 1. Registered Office. The registered office of the corporation in the State of Delaware shall be in the City of Wilmington, County of New Castle.

Section 2. Other Offices. The corporation shall also have and maintain an office or principal place of business at 2200 Mission College Boulevard, Santa Clara, County of Santa Clara, State of California, and may also have offices at such other places, both within and without the State of Delaware, as the Board of Directors may from time to time determine or the business of the corporation may require.

ARTICLE II

Stockholders' MeetingsSection 1. Place of Meetings.

(a) Meetings of the stockholders of the corporation shall be held at such place, either within or without the State of Delaware, as may be designated from time to time by the Board of Directors, or, if not so designated, then at the office of the corporation required to be maintained pursuant to Section 2 of Article I hereof.

(b) The Board of Directors may, in its sole discretion, determine that the meeting shall not be held at any place, but may instead be held solely by means of remote communication in accordance with Section 211(a)(2) of the Delaware General Corporation Law. If authorized by the Board of Directors in its sole discretion, and subject to such guidelines and procedures as the Board of Directors may adopt, stockholders and proxyholders not physically present at a meeting of stockholders may, by means of remote communication (a) participate in a meeting of stockholders; and (b) be deemed present in person and vote at a meeting of stockholders whether such meeting is to be held at a designated place or solely by means of remote communication, provided that (i) the corporation shall implement reasonable measures to verify that each person deemed present and permitted to vote at the meeting by means of remote communication is a stockholder or proxyholder; (ii) the corporation shall implement reasonable measures to provide such stockholders and proxyholders a reasonable opportunity to participate in the meeting and to vote on matters submitted to the stockholders, including an opportunity to read or hear the proceedings of the meeting substantially concurrently with such proceedings; and (iii) if any stockholder or proxyholder votes or takes other action at the meeting by means of remote communication, a record of such vote or other action shall be maintained by the corporation.

Section 2. Annual Meetings. The annual meetings of the stockholders of the corporation for the purpose of election of directors and for such other business as may lawfully come before it, shall be held on such date and at such time as may be designated from time to time by the Board of Directors, but in no event more than fifteen (15) months after the date of the preceding annual meeting.

Section 3. Special Meetings. Special meetings of the stockholders of the corporation may be called, for any purpose or purposes, by the Chairman of the Board or the President or the Board of Directors at any time.

Section 4. Notice of Meetings.

(a) Except as otherwise provided by law or the Certificate of Incorporation, written notice (as the term “written” is defined in Article XII hereof) of each meeting of stockholders, specifying the place, if any, date and hour of the meeting; the means of remote communications, if any, by which stockholders and proxyholders may be deemed to be present in person and vote at such meeting; and the purpose or purposes of the meeting, shall be given not less than ten (10) nor more than sixty (60) days before the date of the meeting to each stockholder entitled to vote thereat, directed to the stockholder in accordance with the procedures set forth in Article X hereof. Notice shall be deemed to have been given to all stockholders of record who share an address if notice is given in accordance with the “householding” rules set forth in Rule 14a-3(e) under the Securities Exchange Act of 1934, as amended (“Exchange Act”).

(b) If at any meeting action is proposed to be taken which, if taken, would entitle stockholders fulfilling the requirements of Section 262(d) of the Delaware General Corporation Law to an appraisal of the fair value of their shares, the notice of such meeting shall contain a statement of that purpose and to that effect and shall be accompanied by a copy of that statutory section.

(c) When a meeting is adjourned to another time or place, notice need not be given of the adjourned meeting if the time and place, if any, thereof, and the means of remote communications, if any, by which stockholders and proxyholders may be deemed to be present in person and vote at such meeting, are announced at the meeting at which the adjournment is taken unless the adjournment is for more than thirty days, or unless after the adjournment a new record date is fixed for the adjourned meeting, in which event a notice of the adjourned meeting shall be given to each stockholder of record entitled to vote at the meeting.

(d) Notice of the time, place and purpose of any meeting of stockholders may be waived in writing, either before or after such meeting, and to the extent permitted by law, will be waived by any stockholder by his attendance thereat, in person or by proxy. Any stockholder so waiving notice of such meeting shall be bound by the proceedings of any such meeting in all respects as if due notice thereof had been given.

(e) Unless and until voted, every proxy shall be revocable at the pleasure of the person who executed it or of his legal representatives or assigns, except in those cases where an irrevocable proxy permitted by statute has been given.

Section 5. Quorum and Voting.

(a) At all meetings of stockholders, except where otherwise provided by law, the Certificate of Incorporation, or these Bylaws, the presence, in person or by proxy duly authorized, of the holders of a majority of the outstanding shares of stock entitled to vote shall constitute a quorum for the transaction of business. Shares, the voting of which at said meeting have been enjoined, or which for any reason cannot be lawfully voted at such meeting, shall not be counted to determine a quorum at said meeting. In the absence of a quorum, any meeting of stockholders may be adjourned, from time to time, by vote of the holders of a majority of the shares represented thereat, but no other business shall be transacted at such meeting. At such adjourned meeting at which a quorum is present or represented, any business may be transacted which might have been transacted at the original meeting. The stockholders present at a duly called or convened meeting, at which a quorum is present, may continue to transact business until adjournment, notwithstanding the withdrawal of enough stockholders to leave less than a quorum.

(b) Except as otherwise provided by law, the Certificate of Incorporation or these Bylaws, all action taken by the holders of a majority of the voting power represented at any meeting at which a quorum is present shall be valid and binding upon the corporation.

Section 6. Voting Rights.

(a) Except as otherwise provided by law, only persons in whose names shares entitled to vote stand on the stock records of the corporation on the record date for determining the stockholders entitled to vote at said meeting shall be entitled to vote at such meeting. Shares standing in the names of two (2) or more persons shall be voted or represented in accordance with the determination of the majority of such persons, or, if only one (1) of such persons is present in person or represented by proxy, such person shall have the right to vote such shares and such shares shall be deemed to be represented for the purpose of determining a quorum.

(b) Every person entitled to vote or execute consents shall have the right to do so either in person or by an agent or agents authorized by a written proxy executed by such person or his duly authorized agent, which proxy shall be filed with the Secretary of the corporation at or before the meeting at which it is to be used. Said proxy so appointed need not be a stockholder. No proxy shall be voted on after three (3) years from its date unless the proxy provides for a longer period.

Section 7. List of Stockholders. The officer who has charge of the stock ledger of the corporation shall prepare and make, at least ten (10) days before every meeting of stockholders, a complete list of the stockholders entitled to vote at said

meeting, arranged in alphabetical order, showing the address of and the number of shares registered in the name of each stockholder. Nothing contained in Section 219 of the Delaware General Corporation Law shall require the corporation to include electronic mail addresses or other electronic contact information on such list. Such list shall be open to the examination of any stockholder, for any purpose germane to the meeting, for a period of at least ten (10) days prior to the meeting, either (a) on a reasonably accessible electronic network, provided that the information required to gain access to such list is provided with the notice of the meeting, or (b) during ordinary business hours, at the principal place of business of the corporation. In the event that the corporation determines to make the list available on an electronic network, the corporation may take reasonable steps to ensure that such information is available only to stockholders of the corporation. If the meeting is to be held at a place, the list shall be produced and kept at the time and place of the meeting during the whole time thereof and may be inspected by any stockholder who is present. If the meeting is to be held solely by means of remote communication, the list shall also be open to the examination of any stockholder during the whole time of the meeting on a reasonably accessible electronic network, and the information required to access such list shall be provided with the notice of the meeting.

Section 8. Action Without Meeting.

(a) Unless otherwise provided in the Certificate of Incorporation, any action required by statute to be taken at any annual or special meeting of stockholders of the corporation, or any action which may be taken at any annual or special meeting of such stockholders, may be taken without a meeting, without prior notice and without a vote, if a consent or consents in writing, setting forth the action so taken, are signed by the holders of outstanding stock having not less than the minimum number of votes that would be necessary to authorize or take such action at a meeting at which all shares entitled to vote thereon were present and voted. To be effective, a written consent must be delivered to the corporation by delivery to its registered office in Delaware, its principal place of business, or an officer or agent of the corporation having custody of the book in which proceedings of meetings of stockholders are recorded. Delivery made to the corporation's registered office shall be by hand or by certified or registered mail, return receipt requested. Every written consent shall bear the date of signature of each stockholder who signs the consent and no written consent shall be effective to take the corporate action referred to therein unless, within sixty (60) days of the earliest dated consent delivered in the manner required by this section to the corporation, written consents signed by a sufficient number of holders to take action are delivered to the corporation in accordance with this section.

(b) A telegram, cablegram or other electronic transmission consenting to an action to be taken and transmitted by a stockholder or proxyholder, or by a person or persons authorized to act for a stockholder or proxyholder, shall be deemed to be written, signed and dated for the purposes of this section, provided that any such telegram, cablegram or other electronic transmission sets forth or is delivered with information from which the corporation can determine (a) that the telegram, cablegram or other electronic transmission was transmitted by the stockholder or proxyholder or by

a person or persons authorized to act for the stockholder or proxyholder, and (b) the date on which such stockholder or proxyholder or authorized person or persons transmitted such telegram, cablegram or electronic transmission. The date on which such telegram, cablegram or electronic transmission is transmitted shall be deemed to be the date on which such consent was signed. Except to the extent and in the manner authorized by the Board of Directors, no consent given by telegram, cablegram or other electronic transmission shall be deemed to have been delivered until such consent is reproduced in paper form and until such paper form shall be delivered to the corporation by delivery to its registered office in Delaware, its principal place of business or an officer or agent of the corporation having custody of the book in which proceedings of meetings of stockholders are recorded. Delivery made to the corporation's registered office shall be made by hand or by certified or registered mail, return receipt requested.

(c) Any copy, facsimile or other reliable reproduction of a consent in writing may be substituted or used in lieu of the original writing for any and all purposes for which the original writing could be used, provided that such copy, facsimile or other reproduction shall be a complete reproduction of the entire original writing.

(d) Prompt notice of the taking of the corporate action without a meeting by less than unanimous written consent shall be given to those stockholders who have not consented in writing and who, if the action had been taken at a meeting, would have been entitled to notice of the meeting if the record date of such meeting had been the date that written consents signed by a sufficient number of stockholders to take the action were delivered to the corporation in the manner required by this section.

Section 9. Nominations and Stockholder Business.

(a) Nominations of persons for election to the Board of Directors of the corporation and the proposal of business to be considered by the stockholders may be made at an annual meeting of stockholders (a) pursuant to the corporation's notice of meeting, (b) by or at the direction of the Board of Directors, or (c) by any stockholder of the corporation who is a stockholder of record at the time of giving of notice provided for in this Section 9, who is entitled to vote at the meeting and who complied with the notice procedures set forth in this Section 9.

(b) For nominations or other business to be properly brought before an annual meeting by a stockholder pursuant to this Section 9, the stockholder must have given timely notice thereof in writing to the Secretary of the corporation, and such business must be a proper subject for stockholder action under the Delaware General Corporation Law. To be timely, a stockholder's notice shall be delivered to the Secretary at the principal executive offices of the corporation (if delivered by electronic mail or facsimile, the stockholder's notice shall be directed to the Secretary at the electronic mail address or facsimile number, as the case may be, specified in the company's most recent proxy statement) not less than forty-five (45) days nor more than one hundred twenty (120) days prior to the date on which the corporation first mailed its proxy materials for the prior year's annual meeting of stockholders; provided,

however, that in the event that the date of the annual meeting is advanced by more than thirty (30) days or delayed (other than as a result of adjournment) by more than thirty (30) days from the anniversary of the previous year's annual meeting, notice by the stockholder to be timely must be delivered not later than the close of business on the later of the sixtieth (60th) day prior to such annual meeting or the tenth (10th) day following the day on which public announcement of the date of such meeting is first made. Such stockholder's notice shall set forth (a) as to each person whom the stockholder proposes to nominate for election or reelection as a director all information relating to such person that is required to be disclosed in solicitations of proxies for election of directors, or is otherwise required, in each case pursuant to Regulation 14A under the Exchange Act (including such person's written consent to being named in the proxy statement as a nominee and to serving as a director if elected); (b) as to any other business that the stockholder proposes to bring before the meeting, a brief description of the business desired to be brought before the meeting, the reasons for conducting such business at the meeting and any material interest in such business of such stockholder and the beneficial owner, if any, on whose behalf the proposal is made; and (c) as to the stockholder giving the notice and the beneficial owners if any on whose behalf the nomination or proposal is made (i) the name and address of such stockholder, as they appear on the corporation's books, and of such beneficial owner, and (ii) the class and number of shares of the corporation which are owned beneficially and of record by such stockholder and such beneficial owner.

(c) Notwithstanding anything in this Section 9 to the contrary, in the event that the number of directors to be elected to the Board of Directors of the corporation is increased and there is no public announcement specifying the size of the increased Board of Directors made by the corporation at least seventy (70) days prior to the first anniversary of the preceding year's annual meeting, a stockholder's notice required by this Section 9 shall also be considered timely, but only with respect to nominees for any new positions created by such increase, if it shall be delivered to the Secretary at the principal executive offices of the corporation not later than the close of business on the tenth (10th) day following the day on which such public announcement is first made by the corporation.

(d) Only such business shall be conducted at a special meeting of stockholders as shall have been brought before the meeting pursuant to the corporation's notice of meeting. Nominations of persons for election to the Board of Directors may be made at a special meeting of stockholders at which directors are to be elected pursuant to the corporation's notice of meeting (a) by or at the direction of the Board of Directors or (b) by any stockholder of the corporation who is a stockholder of record at the time of giving of notice provided for in this section, who is entitled to vote at the meeting and who complies with the notice procedures set forth in this section. Nominations by stockholders of persons for election to the Board of Directors may be made at such a special meeting of stockholders if the stockholder's notice required by this section shall be delivered to the Secretary at the principal executive offices of the corporation (if delivered by electronic mail or facsimile, the stockholder's notice shall be directed to the Secretary at the electronic mail address or facsimile number, as the case may be, specified in the company's most recent proxy statement) not earlier than

the one hundred twentieth (120th) day prior to such special meeting and not later than the close of business on the later of the sixtieth (60th) day prior to such special meeting or the tenth (10th) day following the day on which public announcement is first made of the date of the special meeting and of the nominees proposed by the Board of Directors to be elected at such meeting.

(e) Only those persons who are nominated in accordance with the procedures set forth in this section shall be eligible for election as directors at any meeting of stockholders. Only such business shall be conducted at a meeting of stockholders as shall have been brought before the meeting in accordance with the procedures set forth in this section. The chairman of the meeting shall have the power and duty to determine whether a nomination or any business proposed to be brought before the meeting was made in accordance with the procedures set forth in this section and, if any proposed nomination or business is not in compliance with this section, to declare that such defective proposal shall be disregarded.

(f) For purposes of this section, "public announcement" shall mean disclosure in a press release reported by the Dow Jones News Service, Associated Press or comparable national news service or in a document publicly filed by the corporation with the Securities and Exchange Commission pursuant to Section 9, 13, 14 or 15(d) of the Exchange Act.

(g) Notwithstanding the foregoing provisions of this Section 9, a stockholder shall also comply with all applicable requirements of the Exchange Act and the rules and regulations thereunder with respect to the matters set forth in this Section 9. Nothing in this Section 9 shall be deemed to affect any rights of stockholders to request inclusion of proposals in the corporation's proxy statement pursuant to Rule 14a-8 under the Exchange Act.

ARTICLE III

Directors

Section 1. Number and Term of Office. The number of directors which shall constitute the whole of the Board of Directors shall be thirteen (13). With the exception of the first Board of Directors, which shall be elected by the incorporator, and except as provided in Section 3 of this Article III, the directors shall be elected by a plurality vote of the shares represented in person or by proxy, at the stockholders annual meeting in each year and entitled to vote on the election of directors. Elected directors shall hold office until the next annual meeting and until their successors shall be duly elected and qualified. Directors need not be stockholders. If, for any cause, the Board of Directors shall not have been elected at an annual meeting, they may be elected as soon thereafter as convenient at a special meeting of the stockholders called for that purpose in the manner provided in these Bylaws.

Section 2. Powers. The powers of the corporation shall be exercised, its business conducted and its property controlled by or under the direction of the Board of Directors.

Section 3. Vacancies. Vacancies and newly created directorships resulting from any increase in the authorized number of directors may be filled by a majority of the directors then in office, although less than a quorum, or by a sole remaining director, and each director so elected shall hold office for the unexpired portion of the term of the director whose place shall be vacant, and until his successor shall have been duly elected and qualified. A vacancy in the Board of Directors shall be deemed to exist under this section in the case of the death, removal or resignation of any director, or if the stockholders fail at any meeting of stockholders at which directors are to be elected (including any meeting referred to in Section 4 below) to elect the number of directors then constituting the whole Board.

Section 4. Resignations and Removals.

(a) Any director may resign at any time by delivering his written resignation to the Secretary, such resignation to specify whether it will be effective at a particular time, upon receipt by the Secretary or at the pleasure of the Board of Directors. If no such specification is made, it shall be deemed effective at the pleasure of the Board of Directors. When one (1) or more directors shall resign from the Board, effective at a future date, a majority of the directors then in office, including those who have so resigned, shall have power to fill such vacancy or vacancies, the vote thereon to take effect when such resignation or resignations shall become effective, and each director so chosen shall hold office for the unexpired portion of the term of the director whose place shall be vacated and until his successor shall have been duly elected and qualified.

(b) Except as provided in Section 141 of the Delaware General Corporation Law, at a special meeting of stockholders called for the purpose in the manner hereinabove provided, the Board of Directors, or any individual director, may be removed from office, with or without cause, and a new director or directors elected by a vote of stockholders holding a majority of the outstanding shares entitled to vote at an election of directors.

Section 5. Meetings.

(a) The annual meeting of the Board of Directors shall be held immediately after the annual stockholders' meeting and at the place where such meeting is held or at the place announced by the Chairman at such meeting. No notice of an annual meeting of the Board of Directors shall be necessary and such meeting shall be held for the purpose of electing officers and transacting such other business as may lawfully come before it.

(b) Except as hereinafter otherwise provided, regular meetings of the Board of Directors shall be held in the office of the corporation required to be

maintained pursuant to Section 2 of Article I hereof. Regular meetings of the Board of Directors may also be held at any place within or without the State of Delaware which has been designated by resolutions of the Board of Directors or the written consent of all directors. Notice of regular meetings of the directors is hereby dispensed with and no notice whatever of any such meetings need be given.

(c) Special meetings of the Board of Directors may be held at any time and place within or without the State of Delaware whenever called by the Chairman of the Board, the President or by any two of the directors.

(d) Written notice of the time and place of all special meetings of the Board of Directors shall be delivered to each director at least twenty-four (24) hours before the start of the meeting, or if sent by first class mail, at least seventy-two (72) hours before the start of the meeting. Notice of any meeting may be waived in writing at any time before or after the meeting and will be waived by any director by attendance thereat.

Section 6. Quorum and Voting.

(a) A quorum of the Board of Directors shall consist of a majority of the exact number of directors fixed from time to time in accordance with Section 1 of Article III of these Bylaws, but not less than one (1); provided, however, at any meeting whether a quorum be present or otherwise, a majority of the directors present may adjourn from time to time until the time fixed for the next regular meeting of the Board of Directors, without notice other than by announcement at the meeting.

(b) At each meeting of the Board at which a quorum is present, all questions and business shall be determined by a vote of a majority of the directors present, unless a different vote be required by law, the Certificate of Incorporation, or these Bylaws.

(c) Any member of the Board of Directors, or of any committee thereof, may participate in a meeting by means of conference telephone or other communication equipment by means of which all persons participating in the meeting can hear each other, and participation in a meeting by such means shall constitute presence in person at such meeting.

(d) The transactions of any meeting of the Board of Directors, or any committee thereof, however called or noticed, or wherever held, shall be as valid as though had at a meeting duly held after regular call and notice, if a quorum be present and if, either before or after the meeting, each of the directors not present shall deliver to the corporation a written waiver of notice, or a consent to holding such meeting, or an approval of the minutes thereof. All such waivers, consents or approvals shall be filed with the corporate records or made a part of the minutes of the meeting.

Section 7. Action Without Meeting. Unless otherwise restricted by the Certificate of Incorporation or these Bylaws, any action required or permitted to be taken at any meeting of the Board of Directors or of any committee thereof may be

taken without a meeting, if all members of the Board or of such committee, as the case may be, consent thereto in writing, and such writing or writings are filed with the minutes of proceedings of the Board or committee. Such filing shall be in paper form if the minutes are maintained in paper form or shall be in electronic form if the minutes are maintained in electronic form.

Section 8. Fees and Compensation. Directors shall not receive any stated salary for their services as directors but by resolution of the Board, a fixed fee, with or without expense of attendance, may be allowed for attendance at each meeting and at each meeting of any committee of the Board of Directors. Nothing herein contained shall be construed to preclude any director from serving the corporation in any other capacity as an officer, agent, employee, or otherwise, and receiving compensation therefor.

Section 9. Committees.

(a) Executive Committee: The Board of Directors may appoint an Executive Committee of not less than one (1) member, each of whom shall be a director. The Executive Committee, to the extent permitted by Delaware law, these Bylaws, the Executive Committee Charter or other resolutions of the Board of Directors, shall have and may exercise, when the Board of Directors is not in session, all powers of the Board of Directors in the management of the business and affairs of the corporation, including, without limitation, the power and authority to declare a dividend or to authorize the issuance of stock, except such committee shall not have the power or authority to (a) approve or adopt, or recommend to the corporation's stockholders, any action or matter expressly required by the Delaware General Corporation Law to be submitted to stockholders for approval, or (b) adopt, amend or repeal any bylaw of the corporation.

(b) Other Committees: The Board of Directors may appoint such other committees as may be permitted by law. Such other committees appointed by the Board of Directors shall have such powers and perform such duties as may be prescribed by the resolution or resolutions creating such committee, but in no event shall any such committee have the powers denied to the Executive Committee in these Bylaws.

(c) Term: The members of all committees of the Board of Directors shall serve a term coexistent with that of the Board of Directors which shall have appointed such committee. The Board, subject to the provisions of subsections (a) or (b) of this Section 9, may at any time increase or decrease the number of members of a committee or terminate the existence of a committee; provided, that no committee shall consist of less than one (1) member. The membership of a committee member shall terminate on the date of his death or voluntary resignation, but the Board may at any time for any reason remove any individual committee member and the Board may fill any committee vacancy created by death, resignation, removal or increase in the number of members of the committee. The Board of Directors may designate one (1) or more directors as alternate members of any committee, who may replace any absent

or disqualified member at any meeting of the committee, and, in addition, in the absence or disqualification of any member of a committee, the member or members thereof present at any meeting and not disqualified from voting, whether or not the member or members constitutes a quorum, may unanimously appoint another member of the Board of Directors to act at the meeting in the place of any such absent or disqualified member.

(d) Meetings: Unless the Board of Directors shall otherwise provide, regular meetings of the Executive Committee or any other committee appointed pursuant to this Section 9 shall be held at such times and places as are determined by the Board of Directors, or by any such committee, and when notice thereof has been given to each member of such committee, no further notice of such regular meetings need be given thereafter; special meetings of any such committee may be held at the principal office of the corporation required to be maintained pursuant to Section 2 of Article I hereof, or at any place which has been designated from time to time by resolution of such committee or by written consent of all members thereof, and may be called by any director who is a member of such committee, upon written notice to the members of such committee of the time and place of such special meeting given in the manner provided for the giving of written notice to members of the Board of Directors of the time and place of special meetings of the Board of Directors. Notice of any special meeting of any committee may be waived in writing at any time before or after the meeting and will be waived by any director by attendance thereat. A majority of the authorized number of members of any such committee shall constitute a quorum for the transaction of business, and the act of a majority of those present at any meeting at which a quorum is present shall be the act of such committee.

Section 10. Emeritus Director. The Board of Directors may, from time to time, elect one (1) or more Emeritus Directors, each of whom shall serve, at the pleasure of the Board, until the first meeting of the Board next following the Annual Meeting of Stockholders and for a maximum period of three (3) years, subject to an annual review, or until earlier resignation or removal by the Board (except that founders of the company may remain as Emeritus Directors, subject to the annual review, or until earlier resignation or removal by the Board). Emeritus Directors shall serve as advisors and consultants to the Board of Directors and may be appointed by the Board to serve as advisors and consultants to committees of the Board. Emeritus Directors may be invited to attend meetings of the Board or any committee of the Board for which they have been appointed to serve as advisors and consultants and, if present, may participate in the discussions occurring during such meetings. Emeritus Directors shall not be permitted to vote on matters brought before the Board or any committee thereof and shall not be counted for the purpose of determining whether a quorum of the Board or the committee is present. Emeritus Directors shall receive no fee for their services as Emeritus Directors. Emeritus Directors will not be entitled to receive reimbursement for expenses of meeting attendance, except as approved by the Chairman of the Board. Emeritus Directors may be removed at any time by the Board of Directors.

Section 11: Emergency Bylaws. In the event of any emergency, disaster or catastrophe, as referred to in Section 110 of the Delaware General Corporation Law,

or other similar emergency condition, as a result of which a quorum of the Board of Directors or a standing committee of the Board cannot readily be convened for action, then the director or directors in attendance at the meeting shall constitute a quorum. Such director or directors in attendance may further take action to appoint one (1) or more of themselves or other directors to membership on any standing or temporary committees of the Board as they shall deem necessary and appropriate.

ARTICLE IV

Officers

Section 1. Officers Designated. The officers of the corporation shall be a Chairman of the Board of Directors who shall be a member of the Board of Directors, a President, one (1) or more Vice Presidents, a Secretary, and a Treasurer. The order of the seniority of the Vice Presidents shall be in the order of their nomination, unless otherwise determined by the Board of Directors. The Board of Directors or the Chairman of the Board or the President may also appoint one (1) or more assistant secretaries, assistant treasurers, and such other officers and agents with such powers and duties as it or he or she shall deem necessary. The Board of Directors may assign such additional titles to one (1) or more of the officers as they shall deem appropriate. Any one (1) person may hold any number of offices of the corporation at any one time unless specifically prohibited therefrom by law. The salaries and other compensation of the officers of the corporation shall be fixed by or in the manner designated by the Board of Directors.

Section 2. Tenure and Duties of Officers.

(a) General: All officers shall hold office at the pleasure of the Board of Directors and until their successors shall have been duly elected and qualified, unless sooner removed. Any officer elected or appointed by the Board of Directors may be removed at any time by the Board of Directors. If the office of any officer becomes vacant for any reason, the vacancy may be filled by the Board of Directors. Nothing in these Bylaws shall be construed as creating any kind of contractual right to employment with the corporation.

(b) Duties of the Chairman of the Board of Directors: The Chairman of the Board of Directors shall preside at all meetings of the stockholders and the Board of Directors. The Chairman of the Board of Directors shall perform such other duties and have such other powers as the Board of Directors shall designate from time to time.

(c) Duties of President: The President shall preside at all meetings of the stockholders and at all meetings of the Board of Directors, unless the Chairman of the Board of Directors has been appointed and is present. The President shall perform such other duties and have such other powers as the Board of Directors shall designate from time to time.

(d) Duties of Vice Presidents: The Vice Presidents, in the order of their seniority, may assume and perform the duties of the President in the absence or disability of the President or whenever the office of the President is vacant. The Vice President shall perform such other duties and have such other powers as the Board of Directors or the President shall designate from time to time.

(e) Duties of Secretary: The Secretary shall attend all meetings of the stockholders and of the Board of Directors and any committee thereof, and shall record all acts and proceedings thereof in the minute book of the corporation and shall keep the seal of the corporation in safe custody. The Secretary shall give notice, in conformity with these Bylaws, of all meetings of the stockholders, and of all meetings of the Board of Directors and any Committee thereof requiring notice. The Secretary shall perform such other duties and have such other powers as the Board of Directors shall designate from time to time. The President may direct any Assistant Secretary to assume and perform the duties of the Secretary in the absence or disability of the Secretary, and each Assistant Secretary shall perform such other duties and have such other powers as the Board of Directors or the President shall designate from time to time.

(f) Duties of Chief Financial Officer and Treasurer: Each of the Chief Financial Officer and the Treasurer shall control, audit and arrange the financial affairs of the corporation, consistent with the responsibilities delegated to each of them by the corporation's President. The Chief Financial Officer or Treasurer, as the case may be, shall receive and deposit all monies belonging to the corporation and shall pay out the same only in such manner as the Board of Directors may from time to time determine, and shall perform such other duties as the Board of Directors may require. It shall be the duty of the assistant treasurers to assist the Treasurer in the performance of the Treasurer's duties and generally to perform such other duties as may be delegated to them by the Board of Directors.

ARTICLE V

Execution of Corporate Instruments, and Voting of Securities Owned by the Corporation

Section 1. Execution of Corporate Instruments.

(a) The Board of Directors may, in its discretion, determine the method and designate the signatory officer or officers, or other person or persons, to execute any corporate instrument or document, or to sign the corporate name without limitation, except where otherwise provided by law, and such execution or signature shall be binding upon the corporation.

(b) Unless otherwise specifically determined by the Board of Directors or otherwise required by law, formal contracts of the corporation, promissory notes, deeds of trust, mortgages and other evidences of indebtedness of the corporation, and other corporate instruments or documents requiring the corporate seal, and certificates of

shares of stock owned by the corporation, shall be executed, signed or endorsed by the Chairman of the Board, the President, any Vice President or the Secretary. All other instruments and documents requiring the corporate signature, but not requiring the corporate seal, may be executed as aforesaid or in such other manner as may be directed by the Board of Directors.

(c) All checks and drafts drawn on banks or other depositaries on funds to the credit of the corporation, or in special accounts of the corporation, shall be signed by such person or persons as the Board of Directors shall authorize so to do.

Section 2. Voting of Securities Owned by Corporation. All stock and other securities of other corporations owned or held by the corporation for itself, or for other parties in any capacity, shall be voted, and all proxies with respect thereto shall be executed, by the person authorized so to do by resolution of the Board of Directors or, in the absence of such authorization, by the Chairman of the Board (if there be such an officer appointed), or by the President, or by any Vice President.

ARTICLE VI

Shares of Stock

Section 1. Form and Execution of Certificates. Certificates for the shares of stock of the corporation shall be in such form as is consistent with the Certificate of Incorporation and applicable law. Every holder of stock in the corporation shall be entitled to have a certificate signed by, or in the name of the corporation by, the Chairman of the Board (if there be such an officer appointed), or by the President or any Vice President and by the Treasurer or Assistant Treasurer or the Secretary or Assistant Secretary, certifying the number of shares owned by him in the corporation. Any or all of the signatures on the certificate may be a facsimile. In case any officer, transfer agent, or registrar who has signed or whose facsimile signature has been placed upon a certificate shall have ceased to be such officer, transfer agent, or registrar before such certificate is issued, it may be issued with the same effect as if he or she were such officer, transfer agent, or registrar at the date of issue. If the corporation shall be authorized to issue more than one class of stock or more than one series of any class, the powers, designations, preferences and relative, participating, optional or other special rights of each class of stock or series thereof and the qualifications, limitations or restrictions of such preferences and/or rights shall be set forth in full or summarized on the face or back of the certificate which the corporation shall issue to represent such class or series of stock, provided that, except as otherwise provided in Section 202 of the Delaware General Corporation Law, in lieu of the foregoing requirements, there may be set forth on the face or back of the certificate which the corporation shall issue to represent such class or series of stock, a statement that the corporation will furnish without charge to each stockholder who so requests the powers, designations, preferences and relative, participating, optional or other special rights of each class of stock or series thereof and the qualifications, limitations or restrictions of such preferences and/or rights.

Section 2. Lost Certificates. The Board of Directors may direct a new certificate or certificates to be issued in place of any certificate or certificates theretofore issued by the corporation alleged to have been lost or destroyed, upon the making of an affidavit of that fact by the person claiming the certificate of stock to be lost or destroyed. When authorizing such issue of a new certificate or certificates, the Board of Directors may, in its discretion and as a condition precedent to the issuance thereof, require the owner of such lost or destroyed certificate or certificates, or his legal representative, to indemnify the corporation in such manner as it shall require and/or to give the corporation a surety bond in such form and amount as it may direct as indemnity against any claim that may be made against the corporation with respect to the certificate alleged to have been lost or destroyed.

Section 3. Transfers. Transfers of record of shares of stock of the corporation shall be made only upon its books by the holders thereof, in person or by attorney duly authorized, and upon the surrender of a certificate or certificates for a like number of shares, properly endorsed.

Section 4. Fixing Record Dates.

(a) In order that the corporation may determine the stockholders entitled to notice of or to vote at any meeting of stockholders or any adjournment thereof, the Board of Directors may fix a record date, which record date shall not precede the date upon which the resolution fixing the record date is adopted by the Board of Directors, and which record date shall not be more than sixty (60) nor less than ten (10) days before the date of such meeting. If no record date is fixed by the Board of Directors, the record date for determining stockholders entitled to notice of or to vote at a meeting of stockholders shall be at the close of business on the day next preceding the day on which notice is given, or, if notice is waived, at the close of business on the day next preceding the date on which the meeting is held. A determination of stockholders of record entitled to notice of or to vote at a meeting of stockholders shall apply to any adjournment of the meeting; provided, however, that the Board of Directors may fix a new record date for the adjourned meeting.

(b) In order that the corporation may determine the stockholders entitled to consent to corporate action in writing without a meeting, the Board of Directors may fix a record date, which record date shall not precede the date upon which the resolution fixing the record date is adopted by the Board of Directors, and which date shall not be more than ten (10) days after the date upon which the resolution fixing the record date is adopted by the Board of Directors. If no record date has been fixed by the Board of Directors, the record date for determining stockholders entitled to consent to corporate action in writing without a meeting, when no prior action by the Board of Directors is required by the Delaware General Corporation Law, shall be the first date on which a signed written consent setting forth the action taken or proposed to be taken is delivered (a) to the corporation by delivery to its registered office in Delaware, its principal place of business, or an officer or agent of the corporation having custody of the book in which proceedings of meetings of stockholders are recorded, or (b) directly to the corporation, if authorized by the Board of Directors in the case of consents

submitted by electronic transmission. Delivery made to a corporation's registered office shall be by hand or by certified or registered mail, return receipt requested. If no record date has been fixed by the Board of Directors and prior action by the Board of Directors is required by law, the record date for determining stockholders entitled to consent to corporate action in writing without a meeting shall be at the close of business on the day on which the Board of Directors adopts the resolution taking such prior action.

(c) In order that the corporation may determine the stockholders entitled to receive payment of any dividend or other distribution or allotment of any rights or the stockholders entitled to exercise any rights in respect of any change, conversion or exchange of stock, or for the purpose of any other lawful action, the Board of Directors may fix a record date, which record date shall not precede the date upon which the resolution fixing the record date is adopted, and which record date shall be not more than sixty (60) days prior to such action. If no record date is fixed, the record date for determining stockholders for any such purpose shall be at the close of business on the day on which the Board of Directors adopts the resolution relating thereto.

Section 5. Registered Stockholders. The corporation shall be entitled to recognize the exclusive right of a person registered on its books as the owner of shares to receive dividends, and to vote as such owner, and shall not be bound to recognize any equitable or other claim to or interest in such share or shares on the part of any other person, whether or not it shall have express or other notice thereof, except as otherwise provided by the laws of Delaware.

ARTICLE VII

Other Securities of the Corporation

All bonds, debentures and other corporate securities of the corporation, other than stock certificates, may be signed by the Chairman of the Board or the President or any Vice President or such other person as may be authorized by the Board of Directors and the corporate seal impressed thereon or a facsimile of such seal imprinted thereon and attested by the signature of the Secretary or an Assistant Secretary, or the Treasurer or an Assistant Treasurer; provided, however, that where any such bond, debenture or other corporate security shall be authenticated by the manual signature of a trustee under an indenture pursuant to which such bond, debenture or other corporate security shall be issued, the signature of the persons signing and attesting the corporate seal on such bond, debenture or other corporate security may be the imprinted facsimile of the signatures of such persons. Interest coupons appertaining to any such bond, debenture or other corporate security, authenticated by a trustee as aforesaid, shall be signed by the Treasurer or Assistant Treasurer of the corporation, or such other person as may be authorized by the Board of Directors, or bear imprinted thereon the facsimile signature of such person. In case any officer who shall have signed or attested any bond, debenture or other corporate security, or whose facsimile signature shall appear thereon shall have ceased to be such officer of the corporation before the bond, debenture or other corporate security so signed or attested shall have been delivered, such bond, debenture or other corporate security nevertheless may be adopted by the corporation and issued and delivered as though the person who signed the same or whose facsimile signature shall have been used thereon had not ceased to be such officer of the corporation.

ARTICLE VIII

Corporate Seal

The corporation shall have a common seal, upon which shall be inscribed:

“Intel Corporation
Incorporated March 1, 1989
Delaware”

In the event the corporation changes its name, the corporate seal shall be changed to reflect such new name.

ARTICLE IX

Indemnification of

Officers, Directors, Employees and Agents

Section 1. Right to Indemnification. Each person who was or is a party or is threatened to be made a party to or is involved (as a party, witness, or otherwise), in any threatened, pending, or completed action, suit, arbitration, alternative dispute mechanism, inquiry, administrative or legislative hearing, investigation or any other actual, threatened or completed proceeding, including any and all appeals, whether civil, criminal, administrative, or investigative (hereinafter a “Proceeding”), by reason of the fact that he or she, or a person of whom he or she is the legal representative, is or was a director, officer, employee, or agent of the corporation (including service with respect to employee benefit plans) or is or was serving at the request of the corporation as a director, officer, employee, or agent of another corporation or of a partnership, joint venture, trust, or other enterprise, whether the basis of the Proceeding is alleged action in an official capacity as a director, officer, employee, or agent or in any other capacity while serving as a director, officer, employee, or agent (hereafter an “Agent”), shall be indemnified and held harmless by the corporation to the fullest extent authorized by the Delaware General Corporation Law, as the same exists or may hereafter be amended or interpreted (but, in the case of any such amendment or interpretation, only to the extent that such amendment or interpretation permits the corporation to provide broader indemnification rights than were permitted prior thereto) against all expenses, liability, and loss (including attorneys’ fees, judgments, fines, ERISA excise taxes or penalties, and amounts paid or to be paid in settlement, and any interest, assessments, or other charges imposed thereon, and any federal, state, local, or foreign taxes imposed on any Agent as a result of the actual or deemed receipt of any payments under this Article) reasonably incurred or suffered by such person in connection with investigating, defending, being a witness in, or participating in (including on appeal), or preparing for any of the foregoing in, any Proceeding (hereinafter “Expenses”); provided, however, that except as to actions to enforce indemnification rights pursuant to Section 3 of this Article, the corporation shall indemnify any Agent seeking indemnification in connection with a Proceeding (or part thereof) initiated by such person only if the Proceeding (or

part thereof) was authorized by the Board of Directors of the corporation. The right to indemnification conferred in this Article shall be a contract right.

Section 2. Authority to Advance Expenses. Expenses incurred by an officer or director (acting in his capacity as such) in defending a Proceeding shall be paid by the corporation in advance of the final disposition of such Proceeding, provided, however, that if required by the Delaware General Corporation Law, as amended, such Expenses shall be advanced only upon delivery to the corporation of an undertaking by or on behalf of such director or officer to repay such amount if it shall ultimately be determined that he or she is not entitled to be indemnified by the corporation as authorized in this Article or otherwise. Expenses incurred by other Agents of the corporation (or by the directors or officers not acting in their capacity as such, including service with respect to employee benefit plans) may be advanced upon such terms and conditions as the Board of Directors deems appropriate. Any obligation to reimburse the corporation for Expense advances shall be unsecured and no interest shall be charged thereon.

Section 3. Right of Claimant to Bring Suit. If a claim under Section 1 or 2 of this Article is not paid in full by the corporation within thirty (30) days after a written claim has been received by the corporation, the claimant may at any time thereafter bring suit, in a court of competent jurisdiction in the state of Delaware, against the corporation to recover the unpaid amount of the claim and, if successful in whole or in part, the claimant shall be entitled to be paid also the expense (including attorneys' fees) of prosecuting such claim. It shall be a defense to any such action (other than an action brought to enforce a claim for expenses incurred in defending a Proceeding in advance of its final disposition where the required undertaking has been tendered to the corporation) that the claimant has not met the standards of conduct that make it permissible under the Delaware General Corporation Law for the corporation to indemnify the claimant for the amount claimed. The burden of proving such a defense shall be on the corporation. Neither the failure of the corporation (including its Board of Directors, independent legal counsel, or its stockholders) to have made a determination prior to the commencement of such action that indemnification of the claimant is proper under the circumstances because he or she has met the applicable standard of conduct set forth in the Delaware General Corporation Law, nor an actual determination by the corporation (including its Board of Directors, independent legal counsel, or its stockholders) that the claimant had not met such applicable standard of conduct, shall be a defense to the action or create a presumption that the claimant has not met the applicable standard of conduct.

Section 4. Provisions Nonexclusive. The rights conferred on any person by this Article shall not be exclusive of any other rights that such person may have or hereafter acquire under any statute, provision of the Certificate of Incorporation, agreement, vote of stockholders or disinterested directors, or otherwise, both as to action in an official capacity and as to action in another capacity while holding such office. To the extent that any provision of the Certificate, agreement, or vote of the stockholders or disinterested directors is inconsistent with these Bylaws, the provision, agreement, or vote shall take precedence.

Section 5. Authority to Insure. The corporation may purchase and maintain insurance to protect itself and any Agent against any Expense, whether or not the corporation would have the power to indemnify the Agent against such Expense under applicable law or the provisions of this Article.

Section 6. Survival of Rights. The rights provided by this Article shall continue as to a person who has ceased to be an Agent and shall inure to the benefit of the heirs, executors, and administrators of such a person.

Section 7. Settlement of Claims. The corporation shall not be liable to indemnify any Agent under this Article (a) for any amounts paid in settlement of any action or claim effected without the corporation's written consent, which consent shall not be unreasonably withheld; or (b) for any judicial award if the corporation was not given a reasonable and timely opportunity, at its expense, to participate in the defense of such action.

Section 8. Effect of Amendment. Any amendment, repeal, or modification of this Article shall not adversely affect any right or protection of any Agent existing at the time of such amendment, repeal, or modification.

Section 9. Subrogation. In the event of payment under this Article, the corporation shall be subrogated to the extent of such payment to all of the rights of recovery of the Agent, who shall execute all papers required and shall do everything that may be necessary to secure such rights, including the execution of such documents necessary to enable the corporation effectively to bring suit to enforce such rights.

Section 10. No Duplication of Payments. The corporation shall not be liable under this Article to make any payment in connection with any claim made against the Agent to the extent the Agent has otherwise actually received payment (under any insurance policy, agreement, vote, or otherwise) of the amounts otherwise indemnifiable hereunder.

ARTICLE X

Notices

(a) Whenever, under any provisions of these Bylaws, notice is required to be given to any stockholder, the same shall be given in writing, either (a) timely and duly deposited in the United States Mail, postage prepaid, and addressed to the stockholder's last known post office address as shown by the stock record of the corporation or its transfer agent or (b) by a form of electronic transmission consented to by the stockholder to whom the notice is given, except to the extent prohibited by Section 232(e) of the Delaware General Corporation Law. Any consent to receive notice by electronic transmission shall be revocable by the stockholder by written notice to the corporation. Any such consent shall be deemed revoked if (i) the corporation is unable to deliver by electronic transmission two (2) consecutive notices given by the

corporation in accordance with such consent and (ii) such inability becomes known to the Secretary or an Assistant Secretary of the corporation or to the transfer agent, or other person responsible for the giving of notice; provided, however, the inadvertent failure to treat such inability as a revocation shall not invalidate any meeting or other action.

(b) Any notice required to be given to any director may be given by the method hereinabove stated. Any such notice, other than one which is delivered personally, shall be sent to such post office address, facsimile number or electronic mail address as such director shall have filed in writing with the Secretary of the corporation, or, in the absence of such filing, to the last known post office address of such director. It shall not be necessary that the same method of giving notice be employed in respect of all directors, but one (1) permissible method may be employed in respect of any one or more, and any other permissible method or methods may be employed in respect of any other or others.

(c) If no post office address of a stockholder or director be known, such notice may be sent to the office of the corporation required to be maintained pursuant to Section 2 of Article I hereof. An affidavit executed by a duly authorized and competent employee of the corporation or the transfer agent or other agent of the corporation appointed with respect to the class of stock affected, specifying the name and post office address or the names and post office addresses of the stockholder or stockholders, director or directors, to whom any such notice or notices was or were given, and the time and method of giving the same (or, for any stockholder or director to whom notice has been directed by electronic transmission, the form of electronic transmission and the facsimile number, electronic mail address or other location to which such notice was directed and the time at which such notice was directed to each such director or stockholder), shall be prima facie evidence of the statements therein contained.

(d) All notices given by mail, as above provided, shall be deemed to have been given as at the time of mailing. All notices given to stockholders by a form of electronic transmission, as above provided, shall be deemed to have been given: (a) if by facsimile, when directed to a number at which the stockholder has consented to receive notice; (b) if by electronic mail, when directed to an electronic mail address at which the stockholder has consented to receive notice; (c) if by a posting on an electronic network together with separate notice to the stockholder of such specific posting, upon the later of (i) such posting and (ii) the giving of such separate notice; and (d) if by any other form of electronic transmission, when directed to the stockholder. All notices given to directors by a form of electronic transmission, as above provided, shall be deemed to have been given when directed to the electronic mail address, facsimile number, or other location filed in writing by the director with the Secretary of the corporation.

(e) The period or limitation of time within which any stockholder may exercise any option or right, or enjoy any privilege or benefit, or be required to act, or within which any director may exercise any power or right, or enjoy any privilege,

pursuant to any notice sent him in the manner above provided, shall not be affected or extended in any manner by the failure of such a stockholder or such director to receive such notice.

(f) Whenever any notice is required to be given under the provisions of the statutes or of the Certificate of Incorporation, or of these Bylaws, a waiver thereof in writing given by the person or persons entitled to said notice, whether before or after the time stated therein, shall be deemed equivalent thereto.

(g) Whenever notice is required to be given, under any provision of law or of the Certificate of Incorporation or Bylaws of the corporation, to any person with whom communication is unlawful, the giving of such notice to such person shall not be required and there shall be no duty to apply to any governmental authority or agency for a license or permit to give such notice to such person. Any action or meeting which shall be taken or held without notice to any such person with whom communication is unlawful shall have the same force and effect as if such notice had been duly given. In the event that the action taken by the corporation is such as to require the filing of a certificate under any provision of the Delaware General Corporation Law, the certificate shall state, if such is the fact and if notice is required, that notice was given to all persons entitled to receive notice except such persons with whom communication is unlawful.

(h) Whenever notice is to be given to the corporation by a stockholder under any provision of law or of the Certificate of Incorporation or Bylaws of the corporation, such notice shall be delivered to the Secretary at the principal executive offices of the corporation. If delivered by electronic mail or facsimile, the stockholder's notice shall be directed to the Secretary at the electronic mail address or facsimile number, as the case may be, specified in the company's most recent proxy statement.

ARTICLE XI

Amendments

Unless otherwise provided in the Certificate of Incorporation, these Bylaws may be repealed, altered or amended or new Bylaws adopted by written consent of the stockholders in the manner authorized by Section 8 of Article II, or at any meeting of the stockholders, either annual or special, by the affirmative vote of a majority of the stock entitled to vote at such meeting. The Board of Directors shall also have the authority to repeal, alter or amend these Bylaws or adopt new Bylaws (including, without limitation, the amendment of any Bylaws setting forth the number of directors who shall constitute the whole Board of Directors) by unanimous written consent or at any annual, regular, or special meeting by the affirmative vote of a majority of the whole number of directors, subject to the power of the stockholders to change or repeal such Bylaws and provided that the Board of Directors shall not make or alter any Bylaws fixing the qualifications, classifications, term of office or compensation of directors.

ARTICLE XII

Electronic Transmission

When used in these Bylaws, the terms “written” and “in writing” shall include any “electronic transmission,” as defined in Section 232(c) of the Delaware General Corporation Law, including without limitation any telegram, cablegram, facsimile transmission and communication by electronic mail.

INTEL CORPORATION
STATEMENT SETTING FORTH THE COMPUTATION
OF RATIOS OF EARNINGS TO FIXED CHARGES
(in millions)

	Three Months Ended	
	March 27, 2004	March 29, 2003
Income before taxes	\$ 2,544	\$ 1,316
Add fixed charges	28	25
Income before taxes and fixed charges	<u>\$ 2,572</u>	<u>\$ 1,341</u>
Fixed charges:		
Interest	\$ 18	\$ 14
Estimated interest component of rental expense	10	11
Total	<u>\$ 28</u>	<u>\$ 25</u>
Ratio of earnings before taxes and fixed charges, to fixed charges	92	54

The following certification includes references to an evaluation of the effectiveness of the design and operation of the company's "disclosure controls and procedures" and to certain matters related to the company's "internal control over financial reporting." Item 4 of Part I of this Quarterly Report presents the conclusions of the Chief Executive Officer and the Chief Financial and Principal Accounting Officer about the effectiveness of the company's disclosure controls and procedures based on and as of the date of such evaluation (relating to Item 4 of the certification), and contains additional information concerning disclosures to the company's Audit Committee and independent auditors with regard to deficiencies in internal control over financial reporting and fraud and related matters (Item 5 of the certification).

CERTIFICATION

I, Craig R. Barrett, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Intel Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - c) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

Each of the undersigned hereby certifies, for the purposes of section 1350 of chapter 63 of title 18 of the United States Code, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, in his capacity as an officer of Intel Corporation ("Intel"), that, to his knowledge, the Quarterly Report of Intel on Form 10-Q for the period ended March 27, 2004, fully complies with the requirements of Section 13(a) of the Securities Exchange Act of 1934 and that the information contained in such report fairly presents, in all material respects, the financial condition and results of operation of Intel. This written statement is being furnished to the Securities and Exchange Commission as an exhibit to such Form 10-Q. A signed original of this statement has been provided to Intel and will be retained by Intel and furnished to the Securities and Exchange Commission or its staff upon request.
